Information on the Notes

Merrill Lynch & Co., Inc. (the "Issuer") has issued Bear Market Strategic Accelerated Redemption Securities ("STARS") linked to the SPDR S&P Retail ETF (the "Index"). The Notes were priced at \$10 each and mature on May 4, 2010.

The STARS are senior, unsecured debt securities of Merrill Lynch & Co., Inc. that provide for an automatic call of the STARS if the closing level of the Index on any Observation Date is less than or equal to the Starting Value of the Index, as determined on the pricing date.

If the STARS are called on any observation date, investors will receive a payment of:

- If called on May 12, 2009: \$11.38 per STARS;
- If called on November 12, 2009: \$12.76 per STARS;
- If called on April 27, 2010: \$14.14 per STARS.

If the STARS are not called prior to the maturity date, then at maturity investors will receive:

- If the Ending Value is less than or equal to the Threshold Value (27.0556):

\$10

- If the Ending Index Value is greater than the Threshold Value (27.0556):

$\$10 + [\$10 \times ((\text{Ending Index Value} - \text{Threshold Value}) / \text{Starting Value}) \times 1]$

The Starting Value of the Index equals: 22.5463. The Ending Value will be determined near the maturity date.

Please see the prospectus for the STARS for more details regarding the calculations and details regarding the Index.

It is expected that the market value of the STARS will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.
