

Be Thrifty on NASDAQ

NASDAQ[®] recognizes the need for innovative routing strategies to enable efficient, low-cost trading of U.S. equities. Thrifty (TFTY) is a new routing strategy that allows you to access low-priced liquidity in all U.S. equities. The new strategy accesses NASDAQ OMX BXSM (BXSM), low-priced liquidity venues and the New York Stock Exchange at a deep discount.

Leverage Growing, Low-Cost Liquidity on BX

BX has grown to trade an average of more than 250 million shares per day in just six months of operation. In addition, BX is the most cost-effective trading venue in the industry. That's why TFTY routes your order to BX first. Using TFTY to route to BX first can provide you with faster and less expensive executions than routing directly to the NYSE. In fact, you will be rebated \$0.0001 per share when you access all U.S. equities on BX.

Trade with TFTY and Save

Start getting fast fills at the best price today with TFTY! For more information on how to best utilize the Thrifty (TFTY) routing strategy, contact **Transaction Services U.S. Market Sales** at +1 800 846 0477.
