

*GET THE **SPEED*** *YOU NEED IN **2012***

NASDAQ OMX® has introduced 40G Client Connectivity for access to all markets and data feeds available in the NASDAQ OMX Co-Location facility. Running on INET technology, 40G connectivity offers significantly reduced latency, consistent reliability and increased bandwidth. Using just one 40G hand-off, you can seamlessly add market and data feed connectivity, without adding latency.

Installation fees waived for orders placed before May 31, 2012.

For more information, contact **Paul Kenyon** at **+1 212 231 5127** or colo@nasdaqomx.com, or refer to the CoLo Console at www.nasdaqomxtrader.com/coloconsole.
