Information on the Notes

Merrill Lynch & Co., Inc. (the "Issuer") has issued Strategic Accelerated Redemption Securities ("STARS") linked to the S&P 500 Index (the "Index"). The Notes were priced at \$10 each and mature on November 30, 2009. The Notes are not principal protected.

STARS are senior, unsecured debt securities of the Issuer that provide for an automatic call of the STARS if the closing level of the Index on any Observation Date is greater than or equal to the Starting Value of the Index. The Observation Dates will occur approximately every six months beginning with the first Observation Date which will occur in December 2008, approximately one year after settlement.

If the STARS are called on any Observation Date, investors will receive a payment of:

- If called in December 2008: \$11.2060 per unit
- If called in May 2009: \$11.8090 per unit
- If called in November 2009: \$12.4120 per unit

If the notes are not called prior to November 30, 2009, then investors will receive:

(1) If the Ending Index Value is greater than or equal to the Threshold Value:

\$10

(2) If the Ending Index Value is less than the Threshold Value:

$\$10 + [\$10 \times (\text{Ending Index Value} - \text{Threshold Value} / \text{Starting Value}) \times 1]$

The Starting Value of the Index is 1,439.70. The Threshold Value is 1,295.73. The Ending Index Value will be the closing level of the Index on the last Observation Date, which will occur in November 2009, if the STARS have not been previously called.

It is expected that the market value of the STARS will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

The Trustee for the securities is The Bank of New York.
