Information on the Notes

Bank of America (the "Issuer") has issued Strategic Accelerated Redemption Securities ("Notes") linked to the S&P 500 Index (the "Index"). The Notes were priced at $10 each and mature on August 2, 2011.

The Notes are senior unsecured debt securities and are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. The Notes will rank equally with all of our other unsecured and unsubordinated debt, and any payments due on the notes, including any repayment of principal, will be subject to the credit risk of the Issuer. The Notes are designed for, but not limited to, investors who anticipate that the Observation Level of the Index on any Observation Date will be less than or equal to the Call Level. The Notes provide for an automatic call if the Observation Level of the Index on any Observation Date is less than or equal to the Call Level. If the Notes are called on any Observation Date, you will receive on the Call Settlement Date an amount per unit (the "Call Amount") equal to the $10 Original Offering Price of the notes plus the applicable Call Premium. If the Notes are not called, the amount investors will receive on the maturity date (the "Redemption Amount") will not be greater than the Original Offering Price per unit and will be based on the direction of and percentage increase in the closing level of the Index from the Starting Value, as determined on the pricing date, to the Ending Value, as determined on the final Observation Date. Investors must be willing to forgo interest payments on the Notes and be willing to accept a repayment that may be less, and potentially significantly less, than the Original Offering Price of the Notes. Investors also must be prepared to have their Notes called by the Issuer on any Observation Date.

If the Notes are called, investors will receive:

- $11.2410 if called on August 2, 2010;
- $11.8615 if called on January 25, 2011; or
- $12.4820 if called on July 26, 2011.

If the Notes are not called, at maturity, investors will receive:
If the Ending Value of the Index is less than the Threshold Value of the Index:

\[ 10 + [10 \times ((\text{Ending Value} - \text{Threshold Value})/\text{Starting Value})] \]

If the Ending Value of the Index is equal to or greater than the Threshold Value of the Index:

\[ 10 \]

The Starting Value of the Index is 975.15. The Threshold Value is 877.64. The Ending Value of the Index will be determined closer to the maturity date.

Please see the prospectus for more details regarding the calculations and details regarding the Index.

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.
