Information on the Notes

UBS AG (the “Issuer”) has issued Exchange Traded Notes (“ETNs” or “Securities” or “Notes”) due November 12, 2043 that are linked to the performance of the NYSE Diversified High Income Index (the "Index"). The Securities provide a monthly compounded two times leveraged long exposure to the performance of the Index, reduced by the Accrued Fees.

Because the Securities are two times leveraged with respect to the Index, the Securities may benefit from two times any positive, but will be exposed to two times any negative, monthly compounded performance of the Index. The Securities may pay a monthly coupon during their term linked to two times the cash distributions, if any, on the Index Constituent Securities. But if the Index Constituent Securities do not make any cash distributions, you will not receive a monthly coupon. Investors will receive a cash payment at maturity, upon acceleration or upon exercise by the Issuer of its Call Right based on the monthly compounded leveraged performance of the Index less the Accrued Fees, calculated as described in the accompanying product supplement. Investors will receive a cash payment upon early redemption based on the monthly compounded leveraged performance of the Index less the Accrued Fees and the Redemption Fee, calculated as described in the prospectus for the ETNs. Payment at maturity or call, upon acceleration or upon early redemption will be subject to the creditworthiness of the Issuer. In addition, the actual and perceived creditworthiness of the Issuer will affect the market value, if any, of the Securities prior to maturity, call, acceleration or early redemption. Investing in the Securities involves significant risks. Investors may lose some or all of their principal at maturity, early redemption, acceleration or upon exercise by the Issuer of its call right if the monthly compounded leveraged return of the Index is not sufficient to offset the negative effect of the Accrued Fees and the Redemption Fee, if applicable. Investors may not receive any monthly coupon payment during the term of the Securities.

Please see the prospectus for the Notes for more details regarding the calculations and details regarding the Index.
It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, and the credit ratings of the Issuer.
