

**William Terrell**  
First Vice President  
Market Operations

**Memo No.# 0807-08**

April 28, 2008

To: Equity Options Members and Member Firms  
Subject: Update to Equity Options Trading System Platform

---

Additional requirements will require The Philadelphia Stock Exchange ("PHLX") to extend the roll out of changes being implemented to the Equity Options Trading System to prepare for the Industry Symbology and Complex Order initiatives. A fourth deployment will be added to the existing schedule of changes, listed in Memo No. # 0769-08, and will be activated on Thursday, May 1, 2008. As noted in that previous memo, these changes should be transparent to Member Firms and will **not** affect production application connections or require any application upgrades and/or network changes.

Member Firms who experience any system problems and/or interruption in service on the above stated dates should immediately contact our Trading Floor System Support Group at **215-496-1571**.

If you have any questions regarding this memorandum you may contact Bill Terrell at **215-496-5205**.
