Ishares Ftse/xinhua China 25(FXI)

3 for 1 Stock Split

With this new method of adjustment, it is no longer possible to determine if an adjusted option is in- or out-of-the-money by simply comparing the stock price to the option strike price. When the new method is used, the stock price must always be adjusted by the appropriate factor(s) in order to correctly determine in-the-money amounts or premiums. Option investors must be aware of the number of shares (and possible cash amounts) in the deliverable and the fact that the multiplier used for premium and strike dollar extensions remains unchanged.
