

# LATENCY MONITORING

A CLEAR VIEW INTO YOUR PORT PERFORMANCE

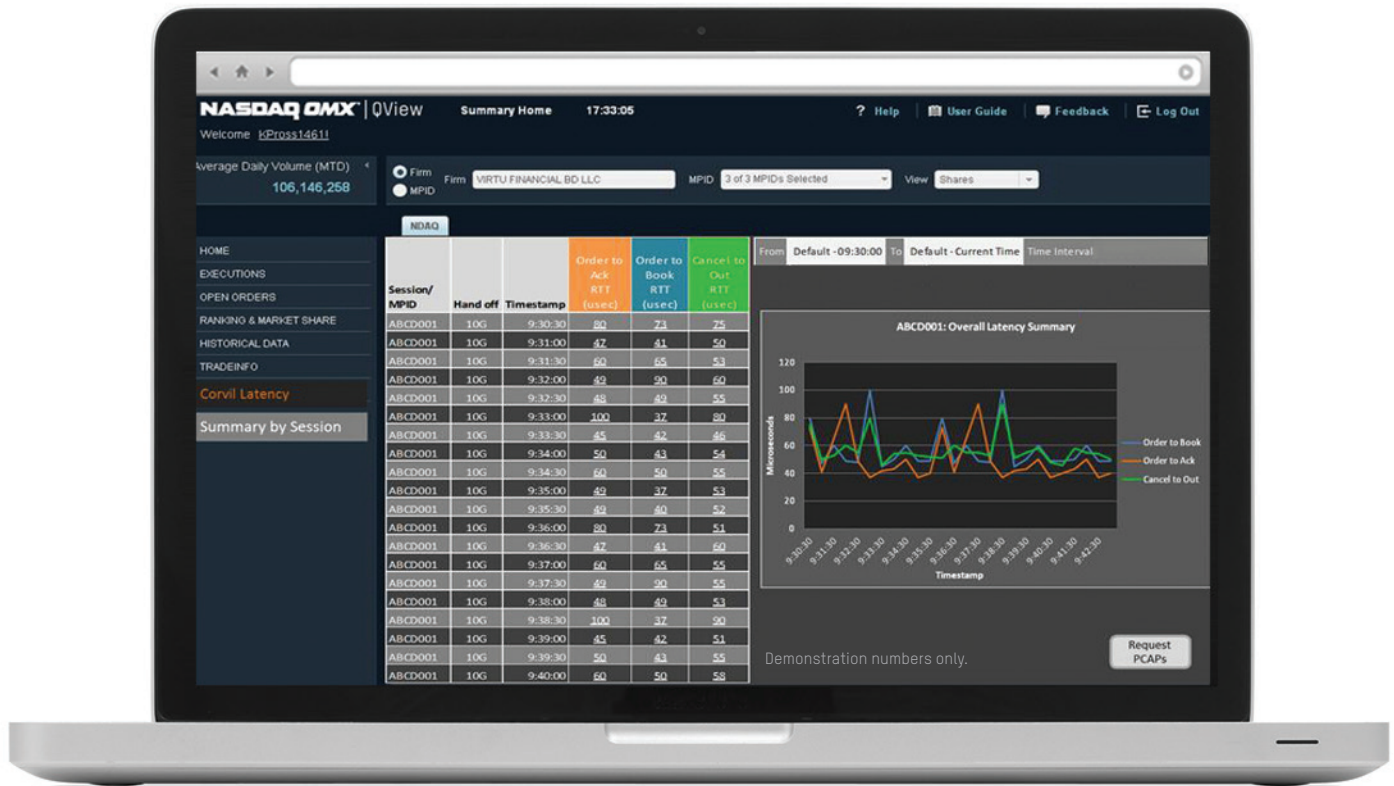

## COMING SOON!

NASDAQ OMX® will soon offer port-level latency monitoring via the NASDAQ OMX Qview<sup>SM</sup> product. Powered by Corvil, the new offerings will provide customers a session-by-session summary of their order flow latencies in the following categories (CURRENTLY NASDAQ ONLY):

+ ORDER TO ACK

+ ORDER TO BOOK

+ CANCEL TO OUT

Customers will be able to expand each session to get a detailed view of the current trading day in each category.
