## 1 Overview

This document details the Nasdaq FIX trade reporting protocol and the user requirements for accessing that protocol for FINRA/Nasdaq TRF trade reporting and clearing, as well as Nasdaq Market Center clearing functions. FINRA and Nasdaq have established a second Trade Reporting Facility, FINRA/NASDAQ TRF Chicago (“TRF Chicago”). The functionality and rules for TRF Chicago are the same as those of the current FINRA / Nasdaq TRF (“TRF Carteret”). This document also outlines the messages transmitted via FIX 4.2 for trade reporting to TRF Carteret and TRF Chicago.

The trade reporting protocol facilitates the reporting of transactions executed otherwise than on an exchange in all NMS stocks as defined in Rule 600(b)(47) of SEC Regulation NMS. Members that use the FINRA/Nasdaq Trade Reporting Facility must comply with the Rule 6300A and 7200A Series, as well as all other applicable rules. It allows you to enter trades and have these trades made available for trade reporting, matching, and clearing. Trades are forwarded to the appropriate reporting agency, either Nasdaq or SIAC, and to the Depository Trust Clearing Corporation (DTCC) as applicable.

As new functionality becomes available, you will receive technical updates detailing that functionality. At the same time the technical update is distributed, this programming specification will be updated on the Nasdaq Trader web site at: <http://www.nasdaqtrader.com/Trader.aspx?id=TradingSpecs>

### 1.1 Nasdaq Customer Support

#### Nasdaq Support

Nasdaq Technical Support: 212.231.5180

#### FINRA Support

FINRA Operations: 866.776.0800

Email: [Finraoperations@finra.org](mailto:Finraoperations@finra.org)

## 2 Nasdaq FIX Trade Reporting

### 2.1 Trade Report Submission

FINRA Rule 6380A(b) prescribes which FINRA member has the trade reporting obligation and is deemed to be the Executing Party under FINRA rules. FINRA members and their reporting agents should refer to FINRA Rule 6380A(b) to determine who is obligated to report a trade. As part of the FINRA reporting obligation validations implemented on 2/29/16, all "contra party" trades (452=17) are required to have "PublishTrdIndicator=N".

In our specification, we refer to the party with the trade reporting obligation as the "Executing party" and other side as the "Contra party."

### 2.2 M1 Matching

Trade entries can be matched in two ways:

- M1 match process; and
- Alleged party acceptance.

Firm A sends in a trade entry message for 1000 shares of XYZ at \$10 alleging Firm B. This entry initiates the M1 trade matching process, which compares trades one-to-one. The system attempts to match the Firm A trade entry with an identical Firm B trade entry. The system finds an identical Firm B trade entry for 1000 shares of XYZ at \$10 and locks it in. See section [Error! Reference source not found.4.3.2.3.](#)

Firm A sends in a trade entry message alleging Firm B. Firm B responds with an accept message (instead of entering in its own trade entry message). Through that acceptance, Firm B enters into a locked-in trade with Firm A. See sections [Error! Reference source not found.4.3.2.3.](#)

### 2.3 Short Sale Reporting

Firms are obligated to include an indication of a short sale transaction as part of their trade entry. As of July 16, 2018, firms are requested to submit using a new FIX Tag 22024 (ShortSaleIndicator) for short sale reporting. Nasdaq TRF will accept either the existing Short Sale Tag 853 or Tag 22024 during a 90 day transition period from July 16 to Oct 15, 2018. After October 15, 2018, submissions with FIX tag 853 will be rejected. [Note: if both short sale reporting methods

are used, the system will use the new reporting method].

The table below defines the supported value combinations for tags 54 and 853, and 22024 during the Short Sale Reporting transition period, July 16 to October 15, 2018. Value combinations not defined below will be rejected.

<b>Sale Type</b>	<b>Tag 54</b>	<b>Tag 853</b>	<b>Tag 22024</b>	<b>Comments</b>
Buy	1	blank	blank	
Sell	2	blank	blank	
Cross	8	blank	blank	
Dealer Sold Short	2	0	S	
Dealer Sold Short Exempt	2	1	E	
Selling Customer Sold Short	8	2	S	MPID must be present in tag 375
Selling Customer Sold Short Exempt	8	3	E	MPID must be present in tag 375
Contra Side Sold Short	1	4	S	ContraBroker must be present in tag 375
Contra Side Sold Short Exempt	1	5	E	ContraBroker must be present in tag 375
Selling Customer Sold Short	1	2	S	ContraBroker in tag 375 must be omitted
Selling Customer Sold Short Exempt	1	3	E	ContraBroker in tag 375 must be omitted

Historically, it was not possible for firms to indicate short sale status when accepting a match & compare trade. Beginning on July 16, 2018 it will be possible for the seller to provide a ShortSaleIndicator when accepting trades. After October 15, 2018, the buyer will be blocked from submitting short sale status (via trade entry or trade accept) on a match & compare transaction; rather, it will become the seller’s responsibility to provide short sale status in this case.

On the outbound messaging, short selling information is currently provided in tag 853. During the transition (from July 16 – Oct 15 2018), it will be provided in both tags 853 and 22024. After Oct 15, 2018, customers are expected to look for it in tag 22024. Note that as a short sale is proprietary information, the short sale indicators will be included in an alleged message TTAL only if the firm being alleged is the seller in the transaction.

For more information, please refer to FINRA Trade Reporting FAQs on short sale reporting: <http://www.finra.org/industry/trade-reporting-faq#407>

## 2.4 T-messages v. C-messages

Outgoing messages are identified by names such as TCER or CTER (for Error). Messages with names that begin with "T" are sent to trade reporting firms and non-trade reporting firms. Messages with names that begin with "C" are sent to clearing firms. For example, when a firm is alleged, it receives a TTAL message. That firm's clearing firm receives a CTAL. These message names are included in tag 58 of all outbound messages. Please note that C-messages will not be part of our initial implementation.

## 2.5 Required Fields

Message format tables indicate which tags are required. Fields are required either by FIX (=Y), by Nasdaq (=Q), or by neither (=N).

## 2.6 Price fields

The trade price and contract amount are included in the same tag, AvgPx. Tag 423, PriceType, indicates whether tag 6 is the trade price or the contract amount. The formats of these values are, however, different. The price field is 12 characters in length. The trade price allows six digits for the whole number and six digits for the decimal portion. The contract amount allows 10 digits for the whole number and two digits for the decimal portion.

Decimal Price Field Examples:

Example 1: Six Decimal Unit Price (Unit Price = 6.0258)

Decimal Price Expansion field = "000006.025800"

Example 2: Two Decimal Unity Price (Unit Price - 12.34)

Decimal Price Expansion field = "000012.340000"

Example 3: Two Decimal Contract Amount (Contract Amount = 6758.75)

Decimal Price Expansion field = "0000006758.75"

Example 4: Two Decimal Contract Amount (Contract Amount = 34.56)

Decimal Price Expansion field = "0000000034.56"

## 2.7 Message Type

Nasdaq FIX supports these message types for trade reporting:

Type	Message	Inbound, Outbound, or Both
A	Logon	B
0	Heartbeat	B
1	Test Request	B
2	Resend Request	B
3	Reject	O
4	Sequence Reset	B
5	Logout	B
8	Execution Report	B

Because `MsgType = 8` is being used for all application messages, tag 856, `TradeReportType`, is used to identify the type of message.

Tag 856, `TradeReportType`:

- |                           |                                   |
|---------------------------|-----------------------------------|
| 0 = submit                | 95 = participant indicator        |
| 1 = alleged               | 96 = blockbuster                  |
| 2 = accept                | 97 = sizable                      |
| 3 = decline               | 98 = net trade threshold          |
| 4 = addendum              | 99 = net trade threshold fallback |
| 6 = trade report cancel   |                                   |
| 7 = locked-in trade break |                                   |
| 8 = error                 |                                   |

<b>Incoming Message</b>	<b>856 =</b>	<b>Outgoing Message</b>	<b>856 =</b>
Entry (Function V)	0	TTEN/CTEN/TREN/CREN/TGEN/CGEN/TKEN/CKEN/TYEN/CYEN	0
Accept (Function A)	2	TTAL/CTAL/TRAL/CRAL/TGAL/CGAL/TKAL/CKAL/TYAL/CYAL	1
Break (Function B)	7	TCLK/CCLK	2
Cancel (Function C)	6	TCBK/CCBK	7
Decline (Function D)	3	TCAN/CCAN	6
Error (Function E)	8	TCDE/CCDE	3
		TCER/CCER	8
		TTUD/CTUD	4
		TCPI	95
		TCBT/CCBT	96
		TCST/CCST	97
		TTNT/TTNP	98
		TTFB/TTFP	99

Please see section 6 for scenarios.

## 2.8 Message Identification

The tables in this section highlight the ID and reference number tags that will be used in Nasdaq FIX trade reporting. They are not complete message formats. Please note that these descriptions apply to messages that you submit to Nasdaq.

All TRADE ENTRY messages from you to Nasdaq have these ID tags:

Tag	Name	Req'd	Description
11	CIOrdID	N	Max 20 char length. Your reference number. This tag is not required to be unique and is not validated in trade reporting.
17	ExecID	Y	Max 20 char length. Your reference number or 0 (zero). This tag is not required to be unique and is not validated in trade reporting.
37	OrderID	Y	Max 20 char length. Your reference number or 0 (zero). This tag is not required to be unique and is not validated in trade reporting.
571	TradeReportID	Y	Max 20 char length. Unique identifier of trade report. Must be unique per day per connector for your firm across all messages.

All other messages from you to Nasdaq have these ID tags:

Tag	Name	Req'd	Description
11	CIOrdID	N	Max 20 char length. Your reference number. This tag is not required to be unique and is not validated in trade reporting.
17	ExecID	Y	Max 20 char length. Your reference number or 0 (zero). This tag is not required to be unique and is not validated in trade reporting.
37	OrderID	Y	Max 20 char length. Your reference number or 0 (zero). This tag is not required to be unique and is not

Tag	Name	Req'd	Description
			validated in trade reporting.
571	TradeReportID	Y	Unique identifier of message. Must be unique per day per connector for your firm across all messages.
572	TradeReportRefID	N	Contains the value indicated in tag 571 in the original trade entry message.
880	TrdMatchID	Y	Nasdaq-assigned, unique alphanumeric control number. This is commonly known as the ACT Control Number.

Acknowledgement messages (ACKs) are sent in response to an inbound message and are sent to the firm that entered that message. Unsolicited messages (UMs) are sent in response to an inbound message and are sent to all non-trade reporting parties included on that inbound message.

All ACKNOWLEDGEMENT messages coming from Nasdaq have these tags:

Tag	Name	Req'd	Description
11	ClOrdID	N	Contains the value indicated in the inbound message, if any.
17	ExecID	Y	Contains the value indicated in the inbound message or 0 (zero).
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero).
571	TradeReportID	Y	Contains the value indicated in the inbound message.
572	TradeReportRefID	N	Contains the first 6 characters of the value indicated in the inbound message, if any.
880	TrdMatchID	Y	Nasdaq assigns a unique alphanumeric control number to every transaction entered into the system. This is commonly known as the ACT Control Number

All UNSOLICITED messages coming from Nasdaq have these tags:

<b>Tag</b>	<b>Name</b>	<b>Req'd</b>	<b>Description</b>
571	TradeReportID	Y	Contains a Nasdaq-defined, unique identification number for this message.
880	TrdMatchID	Y	Nasdaq-assigned, unique alphanumeric control number. This is commonly known as the ACT Control Number.

## 2.9 Possible Duplicates and Resends

You should set tag 43, PossDupFlag, if you are sending a message with a sequence number that was already used. This tag is required for retransmissions. Nasdaq will process as follows:

If tag 43 =	& Seq # is a dup	then, Nasdaq will...
Y	Y	Ignore the message.
Y	N	Process the message normally.
N	Y	Drop the connection.
N	N	Process the message normally.

You should set tag 97, PossResend, if you are sending a message that may be a duplicate of another message. Nasdaq will process as follows:

If tag 97 =	& tag 571 is a dup	then, Nasdaq will...
Y	Y	Send you an acknowledgement, and if this is the first time we are receiving this message, then we will send appropriate responses to all parties involved.
N	Y	Reject the message.
Y	N	Process the message normally.
N	N	Process the message normally.

## 2.10 Explicit Fee

FINRA Rule 7230A(h) allows FINRA members to collect explicit fee amounts from broker-dealer customers through the FINRA/Nasdaq TRF. Tag 9822, ClearingPrice, was added for this reason. Firms may submit trade reports that include a transaction fee that, in turn, will be included in the regular clearance and settlement process at the National Securities Clearance Corporation (DTCC). Clearing Price contains Unit Price + Explicit Fee per share, if the tag 423, PriceType, is 98. It contains Contact Price + Total Explicit fee, if PriceType is 99.

Firms must have an agreement with each other on file before they can use trade reporting for the collection/payment of fees. These agreements will be enforced systematically and are maintained by Nasdaq on behalf of FINRA.

You may only use the FINRA/Nasdaq TRF to collect/pay fees from/to other FINRA members. A fee can only be collected when it is included as part of the clearing price. The fee must be per share. You are not allowed to enter transactions that are comprised only of fees.

You have the responsibility to make sure that the trade price is reported to the tape.

This functionality is optional. Please contact Nasdaq if you wish to participate. Section [1.1](#) has contact information.

## **2.11 Timestamps**

The FINRA/Nasdaq TRF supports timestamps with up to nanosecond granularity (HH:MM:SS.ssssssss) in accordance with amendments to FINRA's equity trade reporting rules. Please refer to FINRA Regulatory Notice 20-41 for additional information on firms' reporting obligations under these amendments.

*FINRA/Nasdaq TRF will accept inbound timestamps with either second, millisecond, microseconds, or nanosecond resolution. Outbound timestamps resolution will be sent based on a firm's TRF outbound message configuration. If you would like to make changes to your message configuration, please contact Subscriber Services (subscriber@Nasdaq.com).*

### 3 Session Details

#### 3.1 Hours of Operation

All times are Eastern.

##### 3.1.1 Regular Trading Day

#### Logon/Logoff

- Nasdaq FIX will be up and accessible at 4:00 a.m.
- Nasdaq FIX will remain up and running until 8:00 p.m.
- Although it is not required, we suggest you log off at the end of your trading day. Otherwise, Nasdaq will log you off at shutdown.

	Start Time	End Time
FIX Engine	4:00:00 a.m.	8:00:00 p.m.

#### Messaging

- Pre-market hours are from 8:00:00 a.m. until 9:29:59 a.m.
- Market hours are from 9:30:00 a.m. until 4:00:00 p.m.
- Post-market hours are from 4:00:00 p.m. until 8:00 p.m.
- Trades entered between 4:00:00 a.m. and 7:59:59 a.m. will be rejected.
- Trades submitted after 8:02:00 p.m. will be rejected.
- To correct an as-of trade, you must cancel the trade and re-enter it. This also applies to non-trade reporting party entries.

Time Table	
8:00:00 a.m. to 9:29:59 a.m.	Trades executed during this period must be reported with T modifier within 10 seconds of execution. If not reported within 10 seconds of execution, must be reported with U modifier.

Time Table	
9:30:00 a.m. to 4:00:00 p.m.	Market Hours
4:00:00 pm to 8:00:00 p.m.	End of cancellation/correction period for trades executed between 9:30 a.m. and 4:00 p.m. Trades entered after 4:00p.m. may be cancelled.
8:00:00 p.m.	System Closed (new trade reports will be rejected)
8:00:00 pm – 08:19:59 pm	End of Trade Action You may accept or decline trades entered during regular or after market hours  <i>** New post market hours schedule will be in effect starting October 12, 2015</i>
8:00:00 p.m. to 11:59:59 p.m.	Trades executed during this period are reported the next day on an as-of basis. Trades executed during this period must be reported with T modifier within 15 minutes of system open. If not reported within 15 minutes, must be reported with U modifier.
12:00:00 a.m. to 7:59:59 a.m.	Trades executed during this period must be reported with T modifier within 15 minutes of system open. If not reported within 15 minutes, must be reported with U modifier.

### Trades Executed on Non-business Days

Trades executed on non-business days must be reported by 8:15 a.m. on the next business day with a T modifier.

### Breakdown of cancel/correct impacts by execution and report times:

For T trades, if the Execution Time is 4:00:00 p.m. to 8:00:00 p.m., then Report Time is 4:00:00 p.m. to 8:00 p.m. and the Cancel Time is 4:00:00 p.m. to 8:20:00 p.m.

For T trades, if the Execution Time is 12:00:00 a.m. to 9:29:59 a.m., then Report Time is 8:00:00 a.m. to 8:00:00 p.m. and the Cancel Time is 8:00:00 a.m. to 8:00:00 p.m.

For regular way or modified trades (not T), if the Execution Time is 9:30 a.m. to 4:00:00 p.m., then Report Time is 9:30:00 a.m. to 8:00:00 p.m. and the Cancel Time is 9:30:00 a.m. to 8:00:00 p.m.

For As Of trades, if the Execution Time is 8:00:00 p.m. to 11:59:59 p.m., then Report Time is 8:00:00 a.m. to 8:00:00 p.m. and the Cancel Time is 8:00:00 a.m. to 8:00:00 p.m.

### **3.1.2 Early Close Trading Day**

A planned early market close usually occurs at 1:00 p.m. Nasdaq will notify you of an early close by Head Trader Alert that will provide closing times. In unforeseen circumstances, an unplanned early market close may be necessary. Again, Nasdaq will notify you of such an event by Head Trader Alert. Head Trader Alerts are available online at: <http://www.nasdaqtrader.com/>

#### **Logon/Logoff**

- As with regular trading days, Nasdaq FIX will be up and accessible at 4:00 a.m.
- Logons are accepted any time after 4:00 a.m., and all messaging remains the same through market open.
- Nasdaq FIX will remain up and running until 4:00 p.m.
- Logoffs are not required. If you choose to log off, do so by 4:00 p.m.

#### **Messaging**

- Pre-market hours are from 8:00 a.m. until 9:30 a.m.
- Market hours are from 9:30 a.m. until 1:00 p.m.
- Post-market hours are from 1:00 p.m. until 3:30 p.m.
- Trades entered between 4:00 a.m. and 8:00 a.m. will be rejected.
- Trades submitted after 5:00 p.m. will be rejected.
- To correct an As of Trade, you must cancel the trade and re-enter it. This also applies to non-trade reporting party entries.

### **3.1.3 Submission of Messages on Non-trading Days**

All messages, including logon, will be rejected on non-trading days. Of course, users will be able to logon and test on User Acceptance Test days.

### 3.2 Connectivity

You have the ability to send Nasdaq FIX order messages and Nasdaq FIX trade reporting messages over the same connection, although you may choose to send them over separate connections. You should make the decision after considering your own architecture and performance requirements.

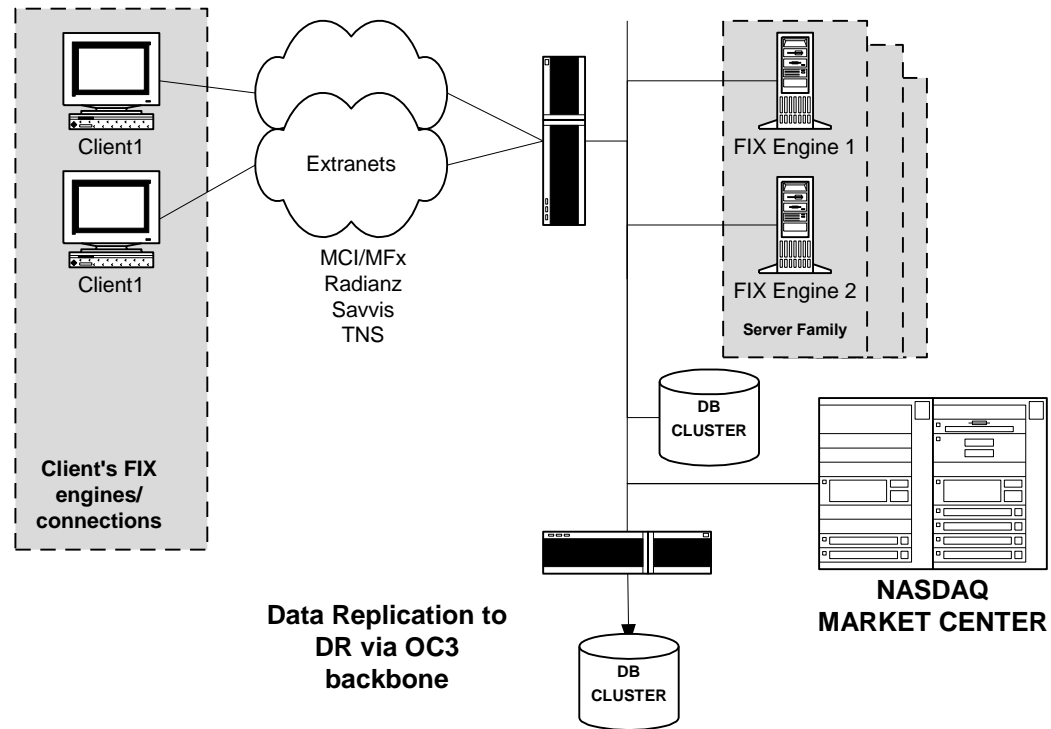

To indicate the destination of your message within Nasdaq, you will use tag 57, `TargetSubID`. The values of this tag are:

- S = Nasdaq Market Center orders
- T = FINRA/Nasdaq TRF and Nasdaq Market Center trade reporting

Messages associated with orders must be sent to Nasdaq's order system, while messages associated with trade entries must be sent to Nasdaq's trade reporting system. You must use T for all trade reporting messages. Trade reporting messages (35 =8) with "S" will be rejected.

- A connector ID is good for one and only one I1I2.
- The initial logon message is validated for both the sender comp ID (MPID) and the sender sub ID (I1I2).
- If logon fails, you will not receive a message indicating this failure.
- Subsequent administrative and application messages will validate the connector ID and I1I2.

### 3.3 Architecture

## 4 Message Formats

### 4.1 Standard Message Formats

All inbound and outbound messages will begin with a standard header and end with a standard footer.

#### 4.1.1 Inbound to Nasdaq Header Format

Tag	Tag Name	Req'd	Nasdaq Implementation
8	BeginString	Y	Unencrypted, must be first field in the message.
9	BodyLength	Y	Unencrypted, must be second field in the message.
34	MsgSeqNum	Y	Integer message sequence number.
35	MsgType	Y	Unencrypted, must be third field in the message. Valid value: 8 = Execution Report
43	PossDupFlag	N	Required for retransmissions. Indicates possible retransmission of message with this sequence number. Valid values: Y = Possible duplicate N = Original transmission
49	SenderCompID	Y	Your 4-character ID assigned by Nasdaq as part of your Nasdaq connectivity.
50	SenderSubID	Y	Your User ID assigned to you as part of your Nasdaq connectivity.
52	SendingTime	Y	Client submitted report time.
56	TargetCompID	Y	NSDQ
57	TargetSubID	Y	1-character that identifies this entry as a trade reporting message. T = Nasdaq Market Center trade reporting For trade reporting, always use T, otherwise your message will be rejected. See section 3.2.
90	SecureDataLen	N	Not supported at this time.

Tag	Tag Name	Req'd	Nasdaq Implementation
91	SecureData	N	Not supported at this time.
97	PossResend	N	Required if the message is being resent and is a possible duplicate of another message sequence number.
115	OnBehalfOfCompID	N	<p>If present, this MPID will be passed to the trade reporting application. If not present, the value in tag 49 will be passed to the trade reporting application. This allows you to use multiple MPIDs through a single connection.</p> <p>For Service Bureaus, if you are sending this message on behalf of your customer, their 4-character MPID is placed here.</p> <p>For both Broker Dealers and regular connections, you can use this field to submit your customer's MPID. This value will be returned to you in tag 128 on the outbound message. Please note that while it is possible for you submit a chain of transactions with inconsistent values for this tag in different messages, you are strongly advised not to do so.</p>
116	OnBehalfOfSubID	N	<p>For both Broker Dealers and regular connections, you can use this field to submit your customer's I1I2. This value will be returned to you in tag 129 on the outbound message. Please note that while it is possible for you submit a chain of transactions with inconsistent values for this tag in different messages, you are strongly advised not to do so.</p>
122	OrigSendingTime	N	Required for message resends. NQ supports standard FIX timestamps - up to nanosecond resolution.

#### 4.1.2 Inbound to Nasdaq Trailer Format

Tag	Field Name	Req'd	Nasdaq Implementation
10	Checksum	Y	3-character end-of-message delimiter that represents the total number of bytes in this message. Unencrypted, must be last field in message.

#### 4.1.3 Outbound from Nasdaq Header Format

Tag	Tag Name	Req'd	Nasdaq Implementation
8	BeginString	Y	Unencrypted, must be first field in the message.
9	BodyLength	Y	Unencrypted, must be second field in the message.
34	MsgSeqNum	Y	Integer message sequence number.
35	MsgType	Y	Unencrypted, must be third field in the message. Valid value: 8 = Execution Report.
43	PossDupFlag	N	Required for retransmissions. Indicates possible retransmission of message with this sequence number. Valid values: Y = Possible duplicate N = Original transmission
49	SenderCompID	Y	NSDQ
50	SenderSubID	Y	1-character indicator that identifies this response as a trade reporting message. T = Nasdaq Market Center trade reporting For trade reporting, always use T. See section <a href="#">3.2</a> .
52	SendingTime	Y	Client submitted report time.
56	TargetCompID	Y	Receiving party's MPID.
57	TargetSubID	Y	Receiving party's I1I2.
90	SecureDataLen	N	Not supported at this time.
91	SecureData	N	Not supported at this time.
97	PossResend	N	Required if the message is being resent and is a possible duplicate of another message sequence number.
122	OrigSendingTime	N	Required for message resends. NQ supports standard FIX timestamps up to nanosecond resolution.
128	DeliverToCompID	N	Your MPID as stated in tag 115 in the inbound message is returned to the service bureau in this tag.
129	DeliverToSubID	N	Your I1I2 as stated in tag 116 in the inbound header is returned to the service bureau in this tag.

**4.1.4 Outbound from Nasdaq Trailer Format**

<b>Tag</b>	<b>Field Name</b>	<b>Req'd</b>	<b>Nasdaq Implementation</b>
10	Checksum	Y	3-character end-of-message delimiter that represents the total number of bytes in this message. Unencrypted, must be last field in message.

## 4.2 Administrative Messages

### 4.2.1 Heartbeat

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>	Y	MsgType = 0
112	TestReqID	N	Required when the heartbeat is in response to a Test Request. It is the TestReqID received from TestRequest message.
	<i>Standard Trailer</i>	Y	

### 4.2.2 Logon

After establishing your TCP connection with Nasdaq FIX, a Logon must be the first message that you send. Nasdaq will respond with its own Logon. You must wait for that Logon before sending additional messages.

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>	Y	MsgType = A
95	RawDataLength	N	
96	RawData	N	
98	EncryptMethod	Y	Must be 0.
108	HeartBtInt	Y	Nasdaq recommends an interval between 30-60 seconds. If you submit a value of less than 30 seconds, the logon will be rejected.
	<i>Standard Trailer</i>	Y	

### 4.2.3 Test Request

The HeartBtInt that is specified in the Logon message will be used to make sure that the customer is alive and functioning. If Nasdaq detects inactivity for a period longer than the HeartBtInt + 1 second, it will send a Test Request to determine if the customer is still active. If after another HeartBtInt, there is still no activity, Nasdaq will send

another test request. If after this additional `HeartBtInt` there is still no activity, Nasdaq will immediately send a logout message and the connection will be closed. It is expected that similar logic will be used on the customer's side in order to detect host activity.

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>	Y	<code>MsgType = 1</code>
112	TestReqID	Y	Date/Time combination
	<i>Standard Trailer</i>	Y	

#### 4.2.4 Resend Request

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>	Y	<code>MsgType = 2</code>
7	BeginSeqNo	Y	Beginning sequence number of Requested Message
16	EndSeqNo	Y	Ending sequence number of Requested Message
	<i>Standard Trailer</i>	Y	

#### 4.2.5 Sequence Reset

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>	Y	<code>MsgType = 4</code>
36	NewSeqNum	Y	Next expected sequence number
123	GapFillFlag	N	
	<i>Standard Trailer</i>	Y	

#### 4.2.6 Logout

Logouts will occur as a normal end of day routine but may also occur as a result of inactivity. It is the customer's responsibility to logout prior to 5:00 p.m. each trading day.

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>	Y	MsgType = 5
58	Text	N	10-character alphanumeric subscriber memo field. The system does not validate this entry. Space-filled if the user has not entered any memo.
	<i>Standard Trailer</i>	Y	

## 4.3 Application Messages

### 4.3.1 Inbound to Nasdaq

#### 4.3.1.1 Entry

Firms use an Entry message to enter either a same-day (T) or an as-of (T+n) trade. In tag 452, PartyRole, you will indicate whether you are the executing party or the contra party. After an initial trade is entered, the contra party may accept a trade entry via an accept message or by entering its version of the trade using this message.

The entry message initiates the M1 trade matching process. This process matches trade reporting firm entries with contra firm entries, which results in a locked-in trade. These entries are matched one-to-one and must, therefore, have identical information in order to be matched. Entries by Automatic Give-Up (AGU) firms and Qualified Special Representatives (QSR) represent trades that are already locked in and, therefore, do not require acceptance or match processing. AGU and QSR relationships are pre-established. Tag 577 identifies firms as AGU or QSR. See Scenario [6.1](#) and [6.3](#).

A trade entry may be designated for trade reporting only, for trade clearing only, for both trade reporting and clearing, or for regulatory reporting only (non-tape, non-clearing). If tag 852 contains a Y, this entry will be processed for tape reporting if it is a T-date trade. It will be processed for Form T if it is a T+n trade.

Because of the number of transactions that it handles, the trade reporting system does not maintain transactions from previous business days unless the transaction was clearing eligible and remains in an open status. As such, firms are not able to cancel a transaction that was locked-in or was submitted for tape-only from a previous date. Firms use a reversal transaction to offset the previous entry. The same sides of the market, i.e., the buy and sell sides, should appear on both the original trade report and the reversal report. This entry message is used for that purpose.

For Example:

If the original trade report reflects Firm A on the sell side and Firm B on the buy side, the reversal report should also reflect Firm A on the sell side and Firm B on the buy side.

For Reg NMS, we are adding a new message format. Users can use either message format **during the transition period**, but once Reg NMS is fully rolled-out, users must use the Reg NMS format which in this spec, follows the Pre-Reg NMS format.

See the scenarios in section 6 for related outbound messages.

## Message Format for Reg NMS

Changes include the addition of a mandatory tag 829, and expansion of tag 277 to allow for multiple values. Additional values have been added to tag 277.

Optional tags 275, 527, 9277, 9278, and 9860 were added in version 2008-02 for expanded REG-NMS message format. These tags may be sent only if tag 452 (Party Role) is "7" Executing Firm. If any of these optional tags are present individually or in combination the system will process the message in the expanded format and as an Executing Firm submission.

Reversal Trades will now require 3 new tags. When 700 is flagged to either "Y" or "K", firms will be required to populate tags 880 (TrdMatchID), 22012 (OrigControlDate), and 22029 (RefReportingFacility) on Entry message. Reversals will be validated on the following criteria:

- Original control date
- Original control #
- Security
- Executing party (unless give-up is present. The give-up MPID will be used if entered)
- Trade Date
- Trade status of the original trade
- Execution Time

If the validation criterion above fails, the reversal will be rejected.

Please Note:

- All trade details must match the original trade.
- Timestamps of reversals must match the original trade down to the nanosecond.
- Reversals must be entered using the same party role as the original trade. If the original trade was entered as "executing party" trade, then the reversal must also be entered as "execution party". If the reversal is entered as a contra party reversal, the reversal would be rejected.

**Note: On Trade Entry Notification and Entry Notification messages back to firms, the Original Control Number entered in tag 880 will be sent back in tag 881.**

Tag	Field Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	Price of this fill.
11	ClOrdID	N	Your reference number. This tag is not required to be unique and is not validated in trade reporting. Maximum 20 characters.
14	CumQty	Y	Quantity bought/sold on this fill. Maximum 8 digits.
17	ExecID	Y	Your reference number or 0 (zero). This tag is not required to be unique and is not validated in trade reporting.
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Your reference number or 0 (zero). This tag is not required to be unique and is not validated in trade reporting.
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid values: 1 = buy 2 = sell 8 = cross  Cross trades will not be supported for AGU or QSR trades beginning 2/29/16. Cross Trades will be rejected if designated as AGU or QSR.

Tag	Field Name	Req'd	Description
55	Symbol	Y	This field will contain the base listed symbol only for listed securities. See <code>SymbolSfx</code> [65] field for additional information about the security.
60	TransactTime	Q	Time of execution of a particular trade expressed in UTC. <b><i>If nanoseconds are not populated, the system will append ".00000000" to the trade report timestamps to comply with FINRA Regulatory Notice 20-41.</i></b>
65	SymbolSfx	N	This field will contain only the additional information about the security (e.g. preferred, warrants, etc.).
75	TradeDate	N	Date of trade in YYYYMMDD format in Eastern Time (ET). <b>Absence of this field indicates current day or previous day depending on the "as-of" flag (tag 5080).</b> Must be entered for T+2 or older.  <b>"Non-Execution Day" trades must be:</b> <ul style="list-style-type: none"> <li>- entered as "as-of"</li> <li>- be marked "non-clearing"</li> <li>- These trades can be either TRF or exchange trades</li> </ul> "Non-Execution Day" trades will not be disseminated to the SIP(s). The "Late modifier" is conditionally assigned when the trade was reported any time after 8:15am the following business day.  <b>"Trades greater than 365 days" must be:</b> <ul style="list-style-type: none"> <li>- entered as "as-of"</li> <li>- be marked "non-clearing"</li> <li>- These trades <b>must</b> be Nasdaq TRF trades</li> </ul>
81	ProcessCode	N	Valid values:

Tag	Field Name	Req'd	Description
			<p>0 = regular (default)            3 = FINRA Step-out trade***            Q = Nasdaq Step-Out            7 = Special trade            8 = Special and Step-out trade***            F = Nasdaq Sales Fee Transfer            2 = FINRA Step-in trade***            A = FINRA Special and step-in trade***            B = FINRA Step-out trade with fees***            C = FINRA Special and Step-out trade with fees***            D = FINRA Position Transfer            M = Clearing Only/Non Regulatory*            N = Special and Clearing Only/Non Regulatory*            O = Clearing Copy**P = Special and Clearing Copy**</p> <p>*Clearing Only/Non Regulatory designations will be used in regards to <a href="#">FINRA Rule Filing Notice 2015-035</a></p> <p>**Clearing Copy designation will be used for Nasdaq <a href="#">NextShares</a>.</p> <p>*** As of 2/29/16, validations on proper step-in and step-out designations will begin. Any TRF trade designated as a step-out must be entered by the Executing Party (MM). Any TRF trade designated as a step-in must be entered as a Contra Party (OE).</p> <p>On FINRA Step-Out transactions with fees (i.e. ProcessCode values of B and C):</p> <ol style="list-style-type: none"> <li>1. Firms must set tag 852 (PublishTrdIndicator) to "N" (FINRA will assess the FINRA Section 3 fee)</li> <li>2. Firms must have tag 577 (ClearingInstruction)</li> </ol>

Tag	Field Name	Req'd	Description
			set to "0"
107	SecurityDesc	N	Valid values: N = Nasdaq Global Select or Nasdaq Global R = Nasdaq Capital Market C = CQS
150	ExecType	Y	Valid value: F = trade report
151	LeavesQty	Y	Valid value: 0 (zero)
275	MDMkt	N	ACT Intended Market Center.  Defines the market to which the trade entry is reported.  Q = Nasdaq Exchange function D = FINRA/Nasdaq TRF (Default)  If tag 81 Process code is F or Q, then MDMkt must = Q  <b>Tag may be sent only if tag 452 (Party Role) is "7" or system will process message as Executing Firm.</b>
277	TradeCondition	Q	Space-delimited list of trade conditions. Modifiers may be combined, within the allowances of the SIAC CTA and UTP Specification documents.  Valid values: Settlement Modifier (Byte 1) 0 = regular (2 Day Settlement) <u>(effective until 5/28/24)</u>

Tag	Field Name	Req'd	Description
			<p> <u>0 = regular (1 Day Settlement) (value in production effective starting 5/28/24)</u>            C = Cash (Same Day)  <u>J = Next Day (effective until 5/28/24)</u>  <u>J = Next Day (retired in production effective 5/28/24)</u>            L = Seller's Option         </p> <p>           Trade Through Exempt Modifier (Byte 2)            2 = FINRA Self Help Indicator            3 = Intermarket Sweep Outbound            4 = Derivatively Priced            6 = Intermarket Sweep Inbound            7 = Qualified Contingent Trade            8 = FINRA Subpenny Indicator            19 = Error Correction            20 = Print Protection         </p> <p>           Extended Hours &amp; Late Modifier (Byte 3)            1 = Pre/Post-market Sold out of Sequence            5 = Pre/Post-market Trade (.T)            I = Late (Sold out of Sequence)         </p> <p>           Trade Modifier (Byte 4)            B = Average Price trade            N = Stopped Stock – may only be submitted when the Modifier 4 Time Field (Tag 22018) is more than 10 seconds prior to execution of the trade            9 = Prior Reference Price may only be submitted when the Modifier 4 Time Field (Tag 22018) is more than 10 seconds prior to the trade execution            16 = Away from market trade as defined in FINRA Rule 6380A(e)(2)            18 = OTC Option Exercise         </p> <p>Note: The U.S. Equity Settlement date is moving from</p>

Tag	Field Name	Req'd	Description
			T+2 to T+1 <b>on May 28, 2024</b> . This shortened settlement date directly impacts regular trade reporting and renders next day settlement obsolete – which is reflected in the updated Specifications. Please refer to the <a href="#">SEC Website</a> for additional information about this rule change.
375	ContraBroker	N	MPID of the other side If you are submitting an internal cross trade, then this value is the same as the MMID. No MPID (blank value) is accepted as a customer trade with a non-FINRA member. <b>Tag must be sent if tag 54 = 8.</b>
423	PriceType	Q	Valid values: 98 = Decimal Unit Price 99 = Contract Amount
440	ClearingAccount	N	4 digit numeric field  The number of the clearing firm associated with the executing party. If you do not enter a number, then Nasdaq uses the default clearing number in your firm profile.
452	PartyRole	Q	Identifies the firm as either the executing party or contra party. See section 2.1. Valid values: 7 = executing firm 17 = contra firm

Tag	Field Name	Req'd	Description
527	SecondaryExecId	N	<p>Trade Reference Number. A Firm populated field to discretely tie a Media eligible transaction to one or more non-Media eligible transactions. The firm might populate this field with the same value on a Media trade and the subsequent non-Media Riskless Principal trade for example</p> <p>This is a six character alphanumeric field.</p> <p><b>Tag may be sent only if tag 452 (Party Role) is "7" or system will process message as Executing Firm.</b></p>
528	OrderCapacity	N	<p>Valid values:  P = principal  A = agent  R = riskless principal</p> <p>Firms must submit OrderCapacity on all trade reports.</p>
571	TradeReportID	Q	<p>Unique identifier of trade capture report. Must be unique per day per connector for your firm across all messages. 20-character alphanumeric.</p>
577	ClearingInstruction	Q	<p>Valid values:  0 = clear  10 = FINRA AGU Lock-in  11 = QSR clear  97 = no clear  98 = QSR no clear  92 = Nasdaq QSR for clearing  93 = Nasdaq AGU for clearing  94 = AGU Clearing, non-risk eligible  95 = Risk Update only, not sent to clearing  96 = Clearing, non-risk eligible</p>

Tag	Field Name	Req'd	Description
700	ReversalIndicator	N	Valid values: N = Not a reversal (default) Y = reversal reported through ACT K = reversal reported through ACT
880	TrdMatchID	Q	This tag must contain the Nasdaq-assigned control number from the original trade entry acknowledgement.  <i>*Required on Reversal trade reports*</i>
829	TrdSubType	Y	Indicates whether the trade is exempt from the trade through rule or not. 0 = No Trade Through Exemption 1 = Trade Through Exemption
852	PublishTrdIndicator	N	Valid values: Y = Report to Tape (default) N = Do Not Report to Tape  If tag 277 = 16, 17, or 18, then tag 852 must = N.  As part of the FINRA reporting obligation validations implemented on 2/29/16, all "contra party" trades (452=17) are required to have "PublishTrdIndicator=N".
853	ShortSaleReason	N	Reason for short sale. Valid values: 0 = Dealer Sold Short 2 = Selling Customer Sold Short 4 = Contra Side Sold Short 1 = Dealer Sold Short Exempt 3 = Selling Customer Sold Short Exempt

Tag	Field Name	Req'd	Description
			<p>5 = Contra Side Sold Short Exempt</p> <p>The use of Tag 853 for Short Sale Reporting will be deprecated starting July 16, 2018 and retired Oct 15, 2018. Tag 22024 will be available for Short Sale Reporting starting July 16, 2018.</p>
855	SecondaryTrdType	N	<p>Number of days associated with trade. This tag must contain a value for ex-clearing transactions; otherwise, Nasdaq will process as a regular trade. Valid values:</p> <p>00 - Cash Trade</p> <p><a href="#">01 - Next Day (effective until 5/28/24)</a> <a href="#">(retired in production effective 5/28/24)</a></p> <p><a href="#">02-60 - Seller's Option (effective starting 5/28/24)</a></p> <p><a href="#">03-60 - Seller's Option (effective until 5/28/24)</a></p> <p><a href="#">Note: The U.S. Equity Settlement date is moving from T+2 to T+1 on May 28, 2024. 	<i>Standard Trailer</i>		

#### **4.3.1.2 Accept, Break, Cancel, Decline, Error**

Instead of sending in its version of the trade via an entry message, the contra party uses an Accept (Function A) message to accept a trade entry and enter into a locked-in trade. Using this message prevents the M1 match process from initiating. By accepting a trade entry, the contra party confirms and agrees to the terms of the trade. See section [6.1](#) for related outbound messages.

Both executing and contra parties may enter a Break (Function B) message to break a locked-in trade. A locked-in trade will be broken only after both the executing party and the contra party have submitted this message. When one party submits this message, cancel messages are disseminated to both parties. This alerts the other party to send in a break trade message. Once a trade has been broken, further trade reconciliation action is prevented, and the trade will be deleted at the end of the entry day. See section [6.7](#) for related outbound messages.

Both executing and contra parties may use the Cancel (Function C) message to cancel a previously reported trade that is not yet locked-in. A QSR firm may, however, cancel a QSR locked-in trade. If the trade is already locked in, firms must use the Break function. If the executing party enters a cancel trade message for a disseminated TRADE REPORTING 1 (T-day) entry, a cancel trade report will be sent to the tape. If the trade was entered in TRADE REPORTING 2 (T+n), this message will act like an error message. If the contra party enters a cancel trade message, the trade will not be processed for clearing. A cancel trade report will not be sent to the tape. All canceled trades will be deleted at the end of the entry day. See section [6.9](#) for related outbound messages.

The contra party or executing party may use the Decline (Function D) message to decline or reject a trade entry because of a disagreement with the terms of the trade. Declined trades will be assigned status "D". However the contra party is still allowed to accept the transaction. Please note:

- Declined trades shall carryover to the next day and be eligible to be Accepted.
- Trades T+22 and older will carryover to the next day and be eligible for match/compare, Accept, or Decline.
  - These trades will not be included in the Auto-lock process

The executing party may use an Error (Function E) message to cancel a previously entered trade that was reported today, but never actually took place. If the trade is already locked in, the executing party must use the Break function. If the original trade was same-day and reported to the tape, then the error will be reported to the tape. If the original trade was not same-day, then the error will not be reported as an error to the tape, but the trade will be marked as an error. Nasdaq will forward a TCER message to both the executing party and contra party to advise them that the

specified trade is updated to Error status. Nasdaq will not match errored trades, allow acceptance of errored trades, forward the trade to clearing, or keep it on record after the end of the entry day. See section [6.11](#) for related outbound messages.

### Message Format

Tag	Field Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	Price of this fill.
11	ClOrdID	N	Your reference number. This tag is not required to be unique and is not validated in trade reporting. Maximum 20 characters.
14	CumQty	Y	Quantity bought/sold on this fill. Maximum 8 digits.
17	ExecID	Y	Your reference number or 0 (zero). This tag is not required to be unique and is not validated in trade reporting.
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Your reference number or 0 (zero). This tag is not required to be unique and is not validated in trade reporting.
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid values: 1 = buy 2 = sell 8 = cross  Cross trades will not be supported for AGU or QSR trades beginning 2/29/16. Cross Trades will be rejected if designated as AGU or QSR.
55	Symbol	Y	This field will contain the base listed symbol only for listed securities. See <code>SymbolSfx</code> [65] field for additional information about the security.

Tag	Field Name	Req'd	Description
65	SymbolSfx	N	This field will contain only the additional information about the security (e.g. preferred, warrants, etc.) for listed securities. This additional information must be in CQS or TMTR format. For example, security "OXYpB" would be formatted as follows: Symbol [55]: OXY SymbolSfx [65]: CQS format: pB TMTR format: .PRB
150	ExecType	Y	Valid value: F = trade report
151	LeavesQty	Y	Valid value: 0 (zero)
571	TradeReportID	Q	Unique identifier of trade capture report. Must be unique per day per connector for your firm across all messages. 20-character alphanumeric.
572	TradeReportRefID	N	Contains the value indicated in tag 571 in the original trade entry message.

Tag	Field Name	Req'd	Description
856	TradeReportType	Q	<p>Used to identify message type.</p> <p>When specifying acceptance, the only valid value is: 2 = accept</p> <p>When specifying a break, the only valid value is: 7 = locked-in trade break</p> <p>When specifying a cancel, the only valid value is: 6 = trade report cancel</p> <p>When specifying a decline, the only valid value is: 3 = decline</p> <p>When specifying an error, the only valid value is: 8 = error</p> <p>See Appendix A: Message Flow Scenarios</p>
880	TrdMatchID	Q	This tag must contain the Nasdaq-assigned control number from the original trade entry acknowledgement.
9862	ContraTradePA	N	<p>Valid values: P = Principal A = agent R = Riskless Principal</p> <p>This is required on all "Accept" transactions where TradeReportType is "2".</p>
22024	ShortSaleIndicator	N	<p>Reason for short sale. Valid values: S = Sold Short E = Sold Short Exempt</p>

Tag	Field Name	Req'd	Description
			Tag 22024 is available for Short Sale Reporting starting July 16, 2018. After October 15, 2018, this is a required field for short sale reporting. [Note: this tag applies to "Accept" transactions and is submitted by the seller.]
	<i>Standard Trailer</i>		

### **4.3.2 Outbound from Nasdaq**

Acknowledgement messages (ACKs) are sent only to the originator of an inbound message. All other parties associated with the trade receive unsolicited messages (UMs).

For all UMs, tag 571 is a unique, Nasdaq-defined number. For all ACKs, tag 571 is an echo of the unique, customer-defined number sent in the inbound message.

For all UMs, tags 11, 17, and 37 will not be returned. For all ACKs, tags 11, 17, and 37 will be returned. In this way, only executing parties receive an echo of their IDs, i.e. contra parties and clearing firms do not receive the executing party's reference numbers.

Firms may add/ delete/ modify outbound FIX message types and/ or verify their Outbound Message configurations(s) (detailed in tag 58) by reaching out to [Subscriber@nasdaq.com](mailto:Subscriber@nasdaq.com).

- **TRF Acknowledgement and Drop Copy Options:**

- **TRF Entry**
- **TRF Alleges**
- **TRF Locks**
- **TRF Breaks**
- **TRF Cancels**
- **TRF Decline**
- **TRF Errors**
- **TRF Clearing Updates**
- **TRF Clearing Notifications**
- **TRF Give Up Notifications**

#### 4.3.2.1 Trade Entry Notification Message Format TYEN/CYEN

When a firm submits an expanded ACT EP trade entry and Nasdaq accepts that entry, a TYEN will be forwarded to the originator. If the executing party is a correspondent of a clearing firm and the clearing firm has elected to receive clearing correspondent messages, a CYEN will be forwarded to the specified clearing firm.

Clients may elect to receive a version 2 format (TYEN/CYEN) containing additional fields, as noted below.

##### Expanded Reg NMS Format

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	Price of this fill.
11	ClOrdID	N	If the clearing firm entered the trade entry, then this tag contains the value indicated in the inbound message or "NA". If this message is a UM, then this tag will not be returned.
14	CumQty	Y	Quantity bought/sold on this fill. Maximum 8 digits.
17	ExecID	Y	Contains the value indicated in the inbound message or 0 (zero).
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero).
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid values: 1 = buy 2 = sell 8 = cross  Cross trades will not be supported for AGU or QSR trades beginning 2/29/16. Cross Trades will be rejected if designated as AGU or QSR.

Tag	Tag Name	Req'd	Description
55	Symbol	Y	This field will contain the base listed symbol only for listed securities. See <code>SymbolSfx</code> [65] field for additional information about the security.
58	Text	Q	Contains message name. TREN or CREN = Reg NMS Format TGEN or CGEN = Expanded Format TKEN or CKEN = FINRA Format (2015) TYEN or CYEN = FINRA Format (2021)
60	TransactTime	Q	Time of execution of a particular trade expressed in UTC.  <b><i>If nanoseconds are not populated, the system will append ".00000000" to the trade report timestamps to comply with FINRA Regulatory Notice <a href="#">20-41</a>.</i></b>
65	SymbolSfx	N	This field will contain only the additional information about the security (e.g. preferred, warrants, etc.).
75	TradeDate	Q	Date of trade in YYYYMMDD format in Eastern Time (ET).
81	ProcessCode	N	Valid values: 0 = regular (default) 3 = FINRA Step-out trade*** Q = Nasdaq Step-Out 7 = Special trade 8 = Special and Step-out trade*** F = Nasdaq Sales Fee Transfer 2 = FINRA Step-in trade*** A = FINRA Special and step-in trade*** B = FINRA Step-out trade with fees*** C = FINRA Special and Step-out trade with fees*** D = FINRA Position Transfer M = Clearing Only/Non Regulatory* N = Special and Clearing Only/Non Regulatory* O = Clearing Copy**

Tag	Tag Name	Req'd	Description
			<p>P = Special and Clearing Copy**</p> <p>*Clearing Only/Non-Regulatory designations will be used in regards to <a href="#">FINRA Rule Filing Notice 2015-035</a></p> <p>**Clearing Copy designation will be used for Nasdaq <a href="#">NextShares</a>.</p> <p>*** As of 2/29/16, validations on proper step-in and step-out designations will begin. 	<i>Standard Trailer</i>		

#### 4.3.2.2 Entry Notification to Alleged Firm Message Format TYAL/CYAL

When a firm enters an expanded Reg NMS compliant trade entry and Nasdaq accepts the entry, a TYAL will be forwarded to the contra party. If the contra party is a correspondent of a clearing firm and the clearing firm is elected to receive clearing correspondent messages, a CYAL with identical contents of the TYAL will be forwarded to the specified clearing firm.

Clients may elect to receive a version 2 format (TYAL/CYAL) containing additional fields, as noted below.

##### Expanded Reg NMS Message Format:

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	Price of this fill.
14	CumQty	Y	Quantity bought/sold on this fill. Maximum 8 digits.
17	ExecID	Y	0 (zero)
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	0 (zero)
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid values: 1 = buy 2 = sell 8 = cross  Cross trades will not be supported for AGU or QSR trades beginning 2/29/16. Cross Trades will be rejected if designated as AGU or QSR.
55	Symbol	Y	This field will contain the base listed symbol only for listed securities. See <code>SymbolSfx</code> [65] field for additional information about the security.
58	Text	Q	Contains message name.

Tag	Tag Name	Req'd	Description
			TRAL or CRAL = Reg NMS Format TGAL or CGAL = Expanded Format TKAL or CKAL = FINRA Format (2015) TYAL or CYAL = FINRA Format (2021)
60	TransactTime	Q	Time of execution of a particular trade expressed in UTC.  <b><i>If nanoseconds are not populated, the system will append ".00000000" to the trade report timestamps to comply with FINRA Regulatory Notice 20-41.</i></b>
65	SymbolSfx	N	This field will contain only the additional information about the security (e.g. preferred, warrants, etc.).
75	TradeDate	Q	Date of trade in YYYYMMDD format in Eastern Time (ET).
81	ProcessCode	N	Indicates whether or not trade was entered as special. Valid values: 0 = regular (default) 3 = FINRA Step-out trade*** Q = Nasdaq Step-Out 7 = Special trade 8 = Special and Step-out trade*** F = Nasdaq Sales Fee Transfer 2 = FINRA Step-in trade*** A = FINRA Special and step-in trade*** B = FINRA Step-out trade with fees*** C = FINRA Special and Step-out trade with fees*** D = FINRA Position Transfer M = Clearing Only/Non Regulatory* N = Special and Clearing Only/Non Regulatory* O = Clearing Copy**

Tag	Tag Name	Req'd	Description
			<p>P = Special and Clearing Copy**</p> <p>*Clearing Only/Non Regulatory designations will be used in regards to <a href="#">FINRA Rule Filing Notice 2015-035</a></p> <p>**Clearing Copy designation will be used for Nasdaq <a href="#">NextShares</a>.</p> <p>*** As of 2/29/16, validations on proper step-in and step-out designations will begin. Any TRF trade designated as a step-out must be entered by the Executing Party (MM). ### 4.3.2.3 Locked-in Notification TCLK/CCLK or TGLK/CGLK

If a trade is accepted by the contra party or if the trade is matched from both sides' entries, then the trade is considered locked-in. If an executing party is locked-in by contra party acceptance or by M1 trade matching, this message will be forwarded to both parties. Because Nasdaq will match buy and sell entries regardless of who entered them, the TCLK message will transmit buy/sell control numbers. CCLK messages will be sent to the appropriate clearing firms.

#### Message Format if Locked-in by Acceptance or Midday Lock of Carryover Trades

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	0 (zero)
11	ClOrdID	N	If this message is an ACK, then this tag contains the value indicated in the inbound message or "NA". If this message is a UM, then this tag is not returned.
14	CumQty	Y	0 (zero)
17	ExecID	Y	If this message is an ACK, then this tag contains the value indicated in the inbound message. If this message is a UM, then this tag is 0 (zero).
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero).
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid value: 7 = unknown
55	Symbol	Y	This tag will always have the value, "N/A".
58	Text	Q	Contains message name: TCLK or CCLK (Pre-Reg NMS) TGLK or CGLK (Post-Reg NMS, also known as "Expanded Format")

Tag	Tag Name	Req'd	Description
150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	Valid value: 0 (zero)
275	MDMkt	N	<p>ACT Intended Market Center.</p> <p>Defines the market to which the trade entry is reported.</p> <p>Q = Nasdaq Exchange function D = FINRA/Nasdaq TRF (Default)</p> <p>If tag 81 Process code is F or Q, then MDMkt must = Q</p> <p><b>Tag may be sent only if tag 452 (Party Role) is "7" or system will process message as Executing Firm.</b></p> <p><b>Tag 275 is available in TGLK/CGLK.</b></p>
571	TradeReportID	Q	If this message is an ACK, then this tag contains the value indicated in the inbound message. If this message is a UM, then this tag contains a Nasdaq-defined, unique identification number for this message.
572	TradeReportRefID	N	If this message is an ACK, then this tag contains the first 6 characters of the value indicated in tag 571 in the original trade entry message.

Tag	Tag Name	Req'd	Description
856	TradeReportType	Q	Used to identify message type.  The TCLK/CCLK message will always contain this value: 2 = Accept  See Appendix A: Message Flow Scenarios.
880	TrdMatchID	Q	The trade match ID number from the buy side of the original trade entry message.
9857	LockedIn	Q	Valid values: A = locked-in by acceptance, else sell control number S = locked-in by acceptance with short sale indication (sent to responsible party accepting the trade only) X = locked-in by acceptance with short sale indication (sent to responsible party accepting the trade only) L = denotes an auto locked in trade against the contra side Z = denotes a split locked in trade against the contra side
	<i>Standard Trailer</i>		

### Message Format if Locked-in by M1

Tag	Tag Name	Req'd	Description
			<b>"7" or system will process message as Executing Firm.</b>
571	TradeReportID	Q	If this message is an ACK, then this tag contains the value indicated in the inbound message. If this message is a UM, then this tag contains a Nasdaq-defined, unique identification number for this message.
856	TradeReportType	Q	Used to identify message type.  The TCLK/CCLK message will always contain this value: 2 = Accept  See Appendix A: Message Flow Scenarios.
880	TrdMatchID	Q	The trade match ID from the buy side of the trade.
881	SecondaryTradeReportRefID	Q	The trade match ID from the sell side of the trade.
	<i>Standard Trailer</i>		

#### 4.3.2.4 Break Notification TCBK/CCBK

This message notifies the contra party that a executing party or contra party has entered a break entry. If this message is used to break a locked-in trade, this message will be forwarded to both buyer and seller. Because Nasdaq will match buy and sell entries regardless of who entered them, the TCLK and TCBK messages will transmit buy/sell control numbers. CCBK messages will be sent to the appropriate clearing firms.

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	0 (zero)
11	ClOrdID	N	If this message is an ACK, then this tag contains the value indicated in the inbound message or "NA". If this message is a UM, then this tag is not returned.
14	CumQty	Y	0 (zero)
17	ExecID	Y	Contains the value indicated in the inbound message or 0 (zero).
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero).
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid value: 7 = unknown
55	Symbol	Y	This tag will always have the value, "N/A".
58	Text	Q	Contains message name, either "TCBK" or "CCBK".
150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	Valid value: 0 (zero)
571	TradeReportID	Q	If this message is an ACK, then this tag contains the value indicated in the inbound

Tag	Tag Name	Req'd	Description
			message. If this message is a UM, then this tag contains a Nasdaq-defined, unique identification number for this message.
572	TradeReportRefID	N	If this message is an ACK, then this tag contains the first 6 characters of the value indicated in tag 571 in the break message.
856	TradeReportType	Q	Used to identify message type.  The TCBK message will always contain this value: 7 = Break  See Appendix A: Message Flow Scenarios.
880	TrdMatchID	Q	If the trade being broken was locked in by M1, then this tag contains the trade match ID from the buy side of the trade. If the trade being broken was locked in by contra party acceptance, then this tag contains the trade match ID from the original trade entry acknowledgement.
881	SecondaryTradeReportRefID	Q	If the trade being broken was locked in by M1, then this tag contains the trade match ID from the sell side of the trade. If the trade being broken was locked in by contra party acceptance, then this tag contains the value, A.
9847	LockedInStatus	Q	Contains the current status of the locked-in trade. Valid values: A = The trade is still locked-in (by trade acceptance) because both trading parties' Break Trade transaction have not been received. L = Auto-locked trade

Tag	Tag Name	Req'd	Description
			M = The trade is still locked-in (by trade matching) because both trading parties' Break Trade transactions have not been received. B = The locked-in trade is effectively broken because both trading parties' Break Trade transactions have been received.
9856	BreakIndicator	Q	B = only buyer has broken S = only seller has broken X = both buyer and seller have broken L = broken through market center
	<i>Standard Trailer</i>		

#### 4.3.2.5 Cancel Notification TCAN/CCAN

If an executing party or contra party cancels a trade, this message will be forwarded to both sides of the trade. CCAN messages will be sent to the appropriate clearing firms.

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	0 (zero)
11	ClOrdID	N	If this message is an ACK, then this tag contains the value indicated in the inbound message or "NA". If this message is a UM, then this tag is not returned.
14	CumQty	Y	0 (zero)
17	ExecID	Y	Contains the value indicated in the inbound message or 0 (zero).
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero).
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid value: 7 = unknown
55	Symbol	Y	This tag will always have the value, "N/A".
58	Text	Q	Contains message name, either "TCAN" or "CCAN".
150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	Valid value: 0 (zero)
571	TradeReportID	Q	If this message is an ACK, then this tag contains the value indicated in the inbound message. If this message is a UM, then this tag contains a Nasdaq-defined, unique identification number for this message.
856	TradeReportType	Q	Used to identify message type.

Tag	Tag Name	Req'd	Description
			<p>The TCAN message will always contain this value: 6 = Cancel</p> <p>See Appendix A: Message Flow Scenarios.</p>
880	TrdMatchID	Q	Nasdaq-assigned, unique control number, commonly known as the ACT control number.
	Standard Trailer		

#### 4.3.2.6 Decline Notification TCDE/CCDE

Executing firms receive this message whenever the contra party declines a trade. CCDE messages will be sent to the appropriate clearing firms.

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	0 (zero)
11	ClOrdID	N	If this message is an ACK, then this tag contains the value indicated in the inbound message or "NA". If this message is a UM, then this tag is not returned.
14	CumQty	Y	0 (zero)
17	ExecID	Y	Contains the value indicated in the inbound message or 0 (zero).
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero).
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid value: 7 = unknown
55	Symbol	Y	This tag will always have the value, "N/A".
58	Text	Q	Contains message name, either "TCDE" or "CCDE".
150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	Valid value: 0 (zero)
571	TradeReportID	Q	If this message is an ACK, then this tag contains the value indicated in the inbound message. If this message is a UM, then this tag contains a Nasdaq-defined, unique identification number for this message.
856	TradeReportType	Q	Used to identify message type.

Tag	Tag Name	Req'd	Description
			The TCDE message will always contain this value: 3 = Decline  See Appendix A: Message Flow Scenarios.
880	TrdMatchID	Q	Nasdaq-assigned, unique control number, commonly known as the ACT control number.
	Standard Trailer		

#### 4.3.2.7 Error Notification TCER/CCER

Both sides of a trade receive this message when the executing party errors a trade. CCER messages will be forwarded to the appropriate clearing firms.

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	0 (zero)
11	ClOrdID	N	If this message is an ACK, then this tag contains the value indicated in the inbound message or "NA". If this message is a UM, then this tag is not returned.
14	CumQty	Y	0 (zero)
17	ExecID	Y	Contains the value indicated in the inbound message or 0 (zero).
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero).
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid value: 7 = unknown
55	Symbol	Y	This tag will always have the value, "N/A".
58	Text	Q	Contains message name, either "TCER" or "CCER".
150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	Valid value: 0 (zero)
571	TradeReportID	Q	If this message is an ACK, then this tag contains the value indicated in the inbound message. If this message is a UM, then this tag contains a Nasdaq-defined, unique identification number for this message.
856	TradeReportType	Q	Used to identify message type.

Tag	Tag Name	Req'd	Description
			The TCER/CCER will always contain this value: 8 = Error  See Appendix A: Message Flow Scenarios
880	TrdMatchID	Q	Nasdaq-assigned, unique control number, commonly known as the ACT control number.
	Standard Trailer		

#### 4.3.2.8 Participant Authorization Indicator Message TCPI

At the start of day, Nasdaq sends this message to communicate all current clearing arrangements. You will receive one message for each relationship. This information can also be accessed via trader.

In addition to start of day messages, intraday messages will be sent to you when:

- the risk management state changes;
- the cap mark changes;
- a record (relationship) is added; and
- a record (relationship) is deleted.

Trader will be updated to reflect these intraday changes.

#### Message Format

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>	Y	MsgType = 8
6	AvgPx	Y	0 (zero)
14	CumQty	Y	0 (zero)
17	ExecID	Y	0 (zero)
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	0 (zero)
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid value: 7 = unknown
55	Symbol	Y	This tag will always have the value, "N/A".
58	Text	Q	Contains message name, "TCPI".
60	TransactTime	Q	Indicates when this message was sent.
150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	0 (zero)

Tag	Field Name	Req'd	Comments
375	ContraBroker		MPID of the executing party associated with this message.
440	ClearingAccount	N	4 digit numeric field. The number of the executing party's clearing firm. If you do not enter a number, then Nasdaq uses the default clearing number in your firm profile.
571	TradeReportID	Q	Contains a Nasdaq-defined, unique identification number for this message.
856	TradeReportType	Q	Used to identify message type. The TCPI message will always contain this value: 95 = participant indicator  See Appendix A: Message Flow Scenarios.
9824	ClearingBroker	Q	ID of the executing party's clearing broker.
9830	IntroBrokerInd	Q	The Introducing Broker gives-up another firm during the execution of the trade. If you enter a trade report that establishes a relationship between you and a give-up firm, then you are the introducing broker. Valid values: A = Active S = Suspended
9831	ExecBrokerInd	Q	The Executing Party "owns" the trade. If your trade entry does not create a give-up relationship, then you are the executing party. If your trade entry establishes a give-up relationship with your and another firm, then the give-up firm is the executing party. Valid values: A = Active S = Suspended
9832	ClearBrokerInd	Q	The Clearing Broker clears the trade. Valid values: A = Active S = Suspended

Tag	Field Name	Req'd	Comments
9833	ResponsibilityInd	Q	Designates the party on each side of a trade that is responsible for trade reporting. This indicator tells Nasdaq if the give-up firm/executing party will act on its own behalf. If a trade involves a give-up on one or both sides, only one party from each side will be enabled to interface with ACT. If the give-up firm is responsible, only that firm can use the trade reporting query/update capabilities for its side. If the give-up firm is not responsible, only the introducing brokers will be allowed to interface with Nasdaq on behalf of its respective give-up firm. Valid values: Y = Yes N = No
9834	TradeRepAvailInd	Q	Indicates the extent of a firm's participation in trade reporting. Valid values: A = Available E = Effective Tomorrow N = Not ready U = Unavailable for technical reasons
9835	MajorClearingInd	Q	Signifies that the clearing broker ID in the message is the executing party's major clearing firm. A self-clearing firm will always be denoted as major. Valid values: M = Major N = not a major arrangement
9836	RiskMgmtInd	Q	Designates that the clearing relationship in this message is functionally active and assigns responsibility to the correspondent or the clearing firm for the entry of all T+2 to T+N entries. Valid values for self-clearing firms are A, M, and D. Valid values: A = Active & correspondent cannot enter As-of T+2 to T+N trades (except self-clearing)

Tag	Field Name	Req'd	Comments
			M = Active with Super-Cap Marker & correspondent cannot enter As-of T+2 to T+N trades (except self-clearing) Y = Active & correspondent can enter As-of T+2 to T+N trades (except self-clearing) N = Active with Super-Cap Marker, correspondent (non-self clearing) can enter As-of T+2 to T+N trades D = Deleted
	Standard Trailer	Y	

#### 4.3.2.9 Blockbuster or Sizable Trade Notification TCBT/CCBT/TCST/CCST

The description below pertains to ACT Risk Management Service, which will be retired following the launch of Post Trade Risk Management.

A **blockbuster** trade is a correspondent trade with a contract amount equal to or greater than either the Blockbuster Trade Dollar Volume set by participant (currently set at \$1 million) or the blockbuster amount set by the clearing firm.

Not subject to blockbuster validation:

- trades submitted to Nasdaq by one of Nasdaq's execution systems;
- QSR entries
- trade-report-only transactions; and
- trades in which the correspondent's risk management capmark is on.

Clearing firms will be notified of blockbuster trades. The trades will not be eligible for matching until either the clearing firm allows the trade or the 15-minute held period is over.

A drop copy TCBT (a TCB2) is available. Contact Nasdaq support to request it. Contact information is in section 1.1.

A **sizable** trade is a correspondent trade with a contract amount equal to or greater than either the Sizable Trade Dollar Volume set by participant (currently set at \$200,000) or by the sizable value set by the clearing firm.

Not subject to sizable validation:

- trades executed in one of Nasdaq's execution systems;
- QSR entries; and
- trade-report-only transactions.

At least one of the executing parties must have the Risk Management Capmark set. If the correspondent's risk management capmark is on, the trade will be subject to sizable validation.

Clearing firms will be notified of sizable trades and the trades will not be eligible for matching until either the clearing firm allows the trade or the 15-minute held period is over. If the clearing firm does not allow the trade within 15 minutes, Nasdaq will inhibit the transaction, and it will not be eligible for Nasdaq's matching process. Clearing firms may set the default action to allow for trades if no response has been received after the 15-minute held period.

### Message Format

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	0 (zero)
14	CumQty	Y	0 (zero)
17	ExecID	Y	0 (zero)
20	ExecTransType	Y	Valid value: 0 = New

150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	0 (zero)
571	TradeReportID	Q	Contains a Nasdaq-defined, unique identification number for this message.
856	TradeReportType	Q	Used to identify message type.  The TCBT/CCBT message will always contain this value: 96 = blockbuster

Tag	Tag Name	Req'd	Description
			<p>The TCST/CCST message will always contain this value: 97 = sizable</p> <p>See Appendix A: Message Flow Scenarios</p>
880	TrdMatchID	Q	Nasdaq-assigned, unique control number, commonly known as the ACT control number.
939	Trade Status	Q	<p>Valid values:</p> <p>81 = CP entry trade - Nasdaq set the CP entry to O after H period expired or allowed by clearing firm</p> <p>88 = held - Nasdaq automatically set H for 15 minutes pending clearing broker action</p> <p>89 = inhibited - if clearing broker inhibited the BBT or sizable</p> <p>90 = killed - Nasdaq set the entry to K after H period expired</p> <p>98 = unanswered MM Entry - Nasdaq set the EP entry to U after H period expired or if allowed by clearing firm</p>
9819	Inhibit Trade Indicator	Q	<p>Valid values:</p> <p>A = one or both clearing firms have allowed the trade, as required</p> <p>B = buy side clearing firm inhibited the trade</p> <p>N = neither clearing firm has inhibited the trade</p> <p>S = sell side clearing firm inhibited the trade</p>
9820	Blockbuster Sizable Start Time	Q	Entry time of the blockbuster or sizable trade.
9821	Blockbuster Sizable Action Time	Q	Time of receipt of action input or expiration of review period.
	<i>Standard Trailer</i>		

#### 4.3.2.10 Net Trade Threshold Notification TTNT/TTNP

These message types below pertain to ACT Risk Management and will no longer be supported following the ACT Risk Management service retirement.

This message notifies firms that the dollar value of this trade increased the Net Amount Traded (NAT) resulting in the Net Trade Threshold (NTT) being exceeded. This threshold alert message shall be forwarded to each party of the trade whose NTT is exceeded and to associated clearing firms.

An identical Pre-Alert Trade Threshold message (TTNP) for correspondents and their clearing firms will be sent if the dollar value of trades exceeds the trade threshold percent established by FINRA.

#### Message Format

#### 4.3.2.11 Net Trade Threshold Fallback Notification TTFB/TTFP

These message types below pertain to ACT Risk Management and will be deprecated with the ACT Risk Management service retirement.

This message notifies firms that the dollar value of this trade decreased the Net Amount Traded (NAT), so that the Net Trade Threshold (NTT) is no longer exceeded. This threshold fallback message shall be forwarded to the parties of the trade whose NAT is now within its NTT limit and to its associated clearing firm.

An identical Pre-Alert Trade Threshold message (TTNP) for correspondents and their clearing firms will be sent if the dollar value of trades exceeding the trade threshold percent established by the participant decreases (due to a trade correction or threshold adjustment).

#### Message Format

#### 4.3.2.12 Post Trade Risk Trade Notification TCBT/CCBT/TCST/CCST

Nasdaq Post Trade Risk Service launches in Q2 2023 and replaces ACT Risk Management Service.

Post Trade Risk uses TCBT/CCBT messages for aggregate held / killed trade notifications. Aggregate limits are compared with daily risk aggregated activity based on their notional dollar volumes on buy / sell or net trade basis as defined by the clearing firm. Aggregate Hold Limits may be configured for each correspondent by the clearing firm and trades are monitored according to Post Trade Risk Data Sources as defined by the clearing firm. Data Sources may include one or more of the following: FINRA/Nasdaq TRF Carteret, FINRA/Nasdaq TRF Chicago, Nasdaq Stock Market, Nasdaq BX, Nasdaq PSX and trades that are sent to Nasdaq's router, RASH.

Following the aggregate hold breach, the default hold action will be applied to held trades at the end of the 15-minute hold period if no explicit trade action is taken by the clearing firm. If the clearing firm defines 'Allow' default action, the clearing firm will be alerted and then following the 15-minute period, the held trade will be released. If the clearing firm sets Inhibit Default Action, the held trade will be killed following the 15-minute period. Firms will be notified for each trade's risk status change.

Post Trade Risk uses TCST / CCST for material per trade breach alerts as defined by the correspondent clearing firm. The default hold action will be applied to held trades at the end of the 15-minute hold period if no explicit trade action is taken by the clearing firm. If the clearing firm defines 'Allow' default action, the clearing firm will be alerted and then following the 15-minute period, the held trade will be released. If the clearing firm sets Inhibit Default Action, the held trade will be killed following the 15-minute period.

Notifications are available to participants on the trade, including Give up Parties, if applicable, as well as correspondent clearing firms.

Post Trade Risk uses the same message format as ACT Risk Management for TCBT/ CCBT / TCST and CCST messages, but Tag 856 (TradeReportType) values have been redefined.

#### Message Format

Tag	Tag Name	Req'd	Description
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	0 (zero)
14	CumQty	Y	0 (zero)

151	LeavesQty	Y	0 (zero)
571	TradeReportID	Q	Contains a Nasdaq-defined, unique identification number for this message.
856	TradeReportType	Q	Used to identify message type.  The TCBT/CCBT message will always contain this value: 96 = aggregate hold / kill  The TCST/CCST message will always contain this value: 97 = Per Trade
880	TrdMatchID	Q	Nasdaq-assigned, unique control number, commonly known as the ACT control number.
939	Trade Status	Q	Valid values:

Tag	Tag Name	Req'd	Description
			81 = CP entry trade - Nasdaq set the CP entry to O after H period expired or allowed by clearing firm 88 = held - Nasdaq automatically set H for 15 minutes pending clearing broker action 89 = inhibited - if clearing broker inhibited the trade 90 = killed - Nasdaq set the entry to K after H period expired 98 = unanswered MM Entry - Nasdaq set the EP entry to U after H period expired or if allowed by clearing firm
9819	Inhibit Trade Indicator	Q	Valid values: A = one or both clearing firms have allowed the trade, as required B = buy side clearing firm inhibited the trade N = neither clearing firm has inhibited the trade S = sell side clearing firm inhibited the trade
9820	Held Trade Start Time	Q	Entry time of the held trade.
9821	Allow/Inhibit Action Time	Q	Time of action input or expiration of trade hold period.
	<i>Standard Trailer</i>		

## 5 Reject Messages

Rejects fall into one of three categories: session, business, and application.

Type	Number
Session	0001-0199
Business	0200-0999
Application	4000

### 5.1 Session

Sometimes, messages that are inbound to Nasdaq FIX are rejected directly, resulting in session level rejects. In these cases, you will receive a reject message (35=3) that includes the reject reason (tag 373) and detailed, specific causes of the reject (tag 58).

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>		MsgType = 3
45	RefSeqNum	Y	MsgSeqNum of Rejected message
58	Text	Q	Where possible, coded message that includes an indicator and text to explain reason for rejection. See the following table.
371	RefTagId	N	The tag number, if appropriate, being referenced in tag 373.
372	RefMsgType	N	The message type (35=?) of the FIX message being referenced.
373	SessionRejectReason	Q	As per FIX specifications, the reason for the reject: Valid values: 0 = Invalid tag number 1 = Required tag missing 2 = Tag not defined for this message type 3 = Undefined Tag

Tag	Field Name	Req'd	Comments
			4 = Tag specified without a value 5 = Value is incorrect (out of range) for this tag 6 = Incorrect data format for value 7 = Decryption problem 8 = Signature problem 9 = CompID problem 10 = SendingTime accuracy problem 11 = Invalid MsgType
	<i>Standard Trailer</i>		

Tag 58
0001 Invalid tag number
0002 Required tag missing
0003 Tag not defined for this message type
0004 Undefined Tag
0005 Tag specified without a value
0006 Value is incorrect (out of range) for tag
0007 Incorrect data format for value
0009 Signature problem
0010 Tag CompID problem
0011 SendingTime accuracy problem
0012 Invalid value for MsgType tag

## 5.2 Business

Messages can also be rejected when tag content validation fails, resulting in business level rejects. In these cases, you will receive a reject message (35=8) that includes the reject reason (tag 751), a detailed, specific causes of the reject (tag 58), and a trade report status of rejected (tag 939 = 1).

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	Price of this fill for Trade Entry messages. 0 (zero) for Accept, Break, Cancel, Decline, and Error messages.
11	ClOrdID	N	This tag will contain the value indicated in the inbound message or "NA".
14	CumQty	Y	Quantity bought/sold on this fill for Trade Entry messages. 0 (zero) for Accept, Break, Cancel, Decline, and Error messages.
17	ExecID	Y	Contains the value indicated in the inbound message or 0 (zero).
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero).
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid values: For Trade Entry messages: 1 = buy 2 = sell 8 = cross For Accept, Break, Cancel, Decline, and Error messages: 7
55	Symbol	Y	For Trade Entry messages, this field will contain the base listed symbol only for listed securities. See <code>SymbolSfx</code> [65] field for additional information about the security. For Accept, Break, Cancel, Decline, and Error

Tag	Field Name	Req'd	Comments
			messages, this tag will contain the value, "N/A".
58	Text	Q	Where possible, coded message that includes an indicator and text to explain reason for rejection. See the following table.
65	SymbolSfx	N	This field will contain only the additional information about the security (e.g. preferred, warrants, etc.) for listed securities. This additional information must be in CQS or TMTR format . For example, security "OXYpB" would be formatted as follows: Symbol [55]: OXY SymbolSfx [65]: CQS format: pB TMTR format: .PRB
150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	Valid value: 0 (zero)
571	TradeReportID	Q	Contains the value indicated in the inbound trade entry message.
751	TradeReportRejectReason	Q	Reason Trade Capture Request was rejected. Valid values: 1 = Invalid party information 2 = Unknown instrument 3 = Unauthorized to report trades 4 = Invalid trade type 6 = Incorrect data format for value 99 = Other
939	TrdRptStatus	Q	1 = Rejected
	<i>Standard Trailer</i>		

The following table lists the application error codes that will populate tag 58.

<b>Tag 58</b>
REJ - SYSTEM NOT AVAILABLE
REJ – TEMPORARILY NOT AVAILABLE
0200 Client Order ID (COrdID) exceeds the Nasdaq specified 20-character limit
0202 Unknown Client Order ID (COrdID)
0206 Invalid SenderSubID
0216 Non-supported Side Value
0224 No Client Order ID (COrdID)/Invalid COrdID provided
0226 Invalid TargetSubID
0232 Transaction Time is Missing
0233 PossDup Flag Must be Y or N or None
0234 PossResend Flag Must be Y or N or None
0236 Error UM has been processed - Possible Duplicate
0241 Client Order ID must be Alphanumeric
0304 Not Within Allowable Time
0305 MPID Not Authorized
0306 Size Over Limit
0319 Action Rejected
0501 Invalid Quantity
0503 Internal Error Unable to Process Message
0504 Error Duplicate CLORDID
0505 Error MsgType Not Supported
0506 Illegal character(s) in COrdID
0507 Error Layer6 CLORDID not found
0508 Error Outbound NSMP Message I1I2 Invalid
0665 Tag 853 no longer supported (after October 15, 2018)

### 5.3 Application

Messages can also be rejected by the application. In these cases, you will receive a reject message (35=8) that includes the reject reason (tag 751), a detailed, specific causes of the reject (tag 58), and a trade report status of rejected (tag 939 = 1).

Tag	Field Name	Req'd	Comments
	<i>Standard Header</i>		MsgType = 8
6	AvgPx	Y	0
11	ClOrdID	N	Contains the value indicated in the inbound message for Trade Entry messages or 0 (zero) for Accept, Break, Cancel, Decline, and Error messages.
14	CumQty	Y	0
17	ExecID	Y	Contains the value indicated in the inbound message for Trade Entry messages or 0 (zero) for Accept, Break, Cancel, Decline, and Error messages.
20	ExecTransType	Y	Valid value: 0 = New
37	OrderID	Y	Contains the value indicated in the inbound message or 0 (zero) for Accept, Break, Cancel, Decline, and Error messages.
39	OrdStatus	Y	0 (zero)
54	Side	Y	Valid values: For Trade Entry messages: 1 = buy 2 = sell 8 = cross For Accept, Break, Cancel, Decline, and Error messages: 7

Tag	Field Name	Req'd	Comments
55	Symbol	Y	For Trade Entry messages, this field will contain the base listed symbol only for listed securities. See <code>SymbolSfx</code> [65] field for additional information about the security. For Accept, Break, Cancel, Decline, and Error messages, this tag will contain the value, "N/A".
58	Text	Q	"4000" followed by reject text to explain reason for rejection. Please see the table below.
65	SymbolSfx	Y	This field will contain only the additional information about the security (e.g. preferred, warrants, etc.) for listed securities. This additional information must be in CQS or TMTR format. For example, security "OXYpB" would be formatted as follows: Symbol [55]: OXY SymbolSfx [65]: CQS format: pB TMTR format: .PRB
150	ExecType	Y	Valid value: I = status
151	LeavesQty	Y	Valid value: 0 (zero)
571	TradeReportID	Q	Contains the value indicated in the inbound trade entry message.
751	TradeReportRejectReason	Q	Reason Trade Capture Request was rejected. Valid values: 1 = Invalid party information 2 = Unknown instrument 3 = Unauthorized to report trades 4 = Invalid trade type 99 = Other
939	TrdRptStatus	Q	1 = Rejected
	<i>Standard Trailer</i>		

The following table lists the application error codes that will populate tag 58. Each of these rejects will be preceded by "4000".

**FINRA/Nasdaq TRF Reason codes:**

Note: FINRA/Nasdaq TRF validation rules apply to FINRA/Nasdaq TRF Carteret and FINRA/Nasdaq TRF Chicago.

**Post Trade Risk Management Reason Codes:**

Nasdaq Post Trade Risk Service launches in Q2 2023 and replaces ACT Risk Management Service. These reject codes pertain to Post Trade Risk Management trade validations.

RISK MGMT EP MAX TRADE LIMIT EXCEEDED
RISK MGMT CP MAX TRADE LIMIT EXCEEDED
RISK MGMT EP BUY REJECT LIMIT EXCEEDED
RISK MGMT CP BUY REJECT LIMIT EXCEEDED
RISK MGMT EP SELL REJECT LIMIT EXCEEDED
RISK MGMT CP SELL REJECT LIMIT EXCEEDED

## 6 Appendix A: Message Flow Scenarios

Because `MsgType = 8` is being used for all submissions, tag 856, `TradeReportType`, is used to identify message type. The scenarios below not only provide an overview of message flow, but also provide the values you should expect in tag 856.

Tag 856, `TradeReportType`:

- 0 = submit
- 1 = alleged
- 2 = accept
- 3 = decline
- 4 = addendum
- 6 = trade report cancel
- 7 = locked-in trade break
- 8 = error

### 6.1 Cross Trades

You enter this...	you get this in response...		your clearing firm gets this...	
Trade Entry (Function V) 856 = 0	TTEN 856 = 0		CTEN 856 = 0	

## 6.2 QSR Submitted Trades

You (AGU or QSR) enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0	TTAL* 856 = 1	CTEN* 856 = 0	CTAL* 856 = 1

\*returned with a status of locked-in

## 6.3 AGU Submitted Trades

You (AGU or QSR) enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0		CTEN * 856 = 0	

\*returned with a status of locked-in

## 6.4 Clearing Broker Fails after Nasdaq Market Center-originated Trade Report

	sell side gets this in response...	contra firm gets this...	sell side's clearing firm gets this...	contra's clearing firm gets this...
At 11:07 a.m., SUMO executes trade	TTEN	TTAL*	CTEN* 856 = 0	CTAL* 856 = 1
At 3:20 p.m., the sell side's clearing broker fails	TTUD anonymity exposed	TTUD anonymity exposed	CTUD anonymity exposed	CTUD anonymity exposed

\*returned with a status of locked-in

## 6.5 Trade Entry Accepted

You enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0	TTAL 856 = 1	CTEN 856 = 0	CTAL 856 = 1
Then, contra...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Accept (Function A) 856 = 2	TCLK 856 = 2	TCLK 856 = 2	CCLK 856 = 2	CCLK 856 = 2

## 6.6 Trade Entry Matched

You enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0	TTAL 856 = 1	CTEN 856 = 0	CTAL 856 = 1
Contra enters this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function W) 856 = 0	TTAL 856 = 1	TTEN 856 = 0	CTAL 856 = 1	CTEN 856 = 0
If...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
M1 Match	TCLK 856 = 2	TCLK 856 = 2	CCLK 856 = 2	CCLK 856 = 2

## 6.7 Trade Entry Accepted then Broken by Contra Party

You enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0	TTAL 856 = 1	CTEN 856 = 0	CTAL 856 = 1
Then, contra...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Accept (Function A) 856 = 2	TCLK 856 = 2	TCLK 856 = 2	CCLK 856 = 2	CCLK 856 = 2
Then, contra...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Break (Function B) 856 = 7	TCBK 856 = 7	TCBK 856 = 7	CCBK 856 = 7	CCBK 856 = 7
Then, you...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Break (Function B) 856 = 7	TCBK 856 = 7	TCBK 856 = 7	CCBK 856 = 7	CCBK 856 = 7

## 6.8 Trade Entry Cancelled by Executing Party

You enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0	TTAL 856 = 1	CTEN 856 = 0	CTAL 856 = 1
Then, you...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Cancel (Function C) 856 = 6	TCAN 856 = 6	TCAN 856 = 6	CCAN 856 = 6	CCAN 856 = 6

## 6.9 Locked-In Trade Entry Cancelled

You enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0	TTAL 856 = 1	CTEN 856 = 0	CTAL 856 = 1
<b>IF QSR Then, you...</b>	<b>you get this in response...</b>	<b>contra firm gets this...</b>	<b>your clearing firm gets this...</b>	<b>contra's clearing firm gets this...</b>
Cancel (Function C) 856 = 6	TCAN 856 = 6	TCAN 856 = 6	CCAN 856 = 6	CCAN 856 = 6
<b>IF NOT QSR Then, you...</b>	<b>you get this in response...</b>	<b>contra firm gets this...</b>	<b>your clearing firm gets this...</b>	<b>contra's clearing firm gets this...</b>
Break (Function B) 856 = 7	TCBK 856 = 7	TCBK 856 = 7	CCBK 856 = 7	CCBK 856 = 7
<b>IF NOT QSR Then, contra...</b>	<b>you get this in response...</b>	<b>contra firm gets this...</b>	<b>your clearing firm gets this...</b>	<b>contra's clearing firm gets this...</b>
Break (Function B) 856 = 7	TCBK 856 = 7	TCBK 856 = 7	CCBK 856 = 7	CCBK 856 = 7

### 6.10 Trade Entry Cancelled by Executing Party Clearing Firm

You enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0	TTAL 856 = 1	CTEN 856 = 0	CTAL 856 = 1
Then, you...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Cancel (Function C) 856 = 6	TCAN 856 = 6	TCAN 856 = 6	CCAN 856 = 6	CCAN 856 = 6

### 6.11 Trade Entry Declined

You enter this...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
Trade Entry (Function V) 856 = 0	TTEN 856 = 0	TTAL 856 = 1	CTEN 856 = 0	CTAL 856 = 1
Then, contra...	you get this in response...	contra firm gets this...	your clearing firm gets this...	contra's clearing firm gets this...
