

Rule 611 - Trade Reporting Matrix

The following Table is being provided as a reference and is intended to represent only how a Rule 611b trade report may be submitted and disseminated via the UTP Trade Data Feed (UTDF). It is the responsibility of each UTP market participant to establish their own trade reporting rules and reporting structure for Reg NMS. The NASDAQ SIP will not validate sale condition value combinations, except to ensure that only valid values are submitted and that each level below may only contain one value from the listed array. Please consult each UTP for more a detailed explanation on how they intend to report trades.
