Re: Extension of the Enhanced Size Pilot (Revised)

The Securities and Exchange Commission has approved a three-month extension of the Enhanced Size Pilot, as well as an increase in the number of options classes included in the pilot (Securities Exchange Act Release No. 46129 (June 26, 2002)). In addition, the definition of "deep-in-the-money" options, which are excluded from the increase quote size requirement, has been amended as described below. The pilot will now extend through October 31, 2002.

Changes to Pilot Effective July 22, 2002

- An additional 17 options classes will be included in the pilot. The additional classes are: Banc of America, Ciena, Dell, Fannie Mae, Motorola, Merrill Lynch, Nvidia, Xilinx, Amazon.com, Halliburton, Nextel Communications, J.P. Morgan Chase, ADC Telecommunication, Best Buy, Calpine, General Motors and Hewlett Packard.

- The definition of “deep-in-the-money” options has been changed to options with strike prices that are in the money by 12 percent or more in relation to the price of the underlying stock. During the initial pilot term, the definition was based on the number of pricing intervals a strike is from the at-the-money strike.

Review of Enhanced Size Pilot Requirements

The pilot requires that PMMs initially enter quotes with a size of at least 100 contracts for customer orders, and 50 contracts for non-customer orders. CMMs must initially enter quotes with a size of 50 contracts for customer orders, and 25 contracts for non-customer orders. PMMs and CMMs are not required to requote when the size of their quotes are decremented by trade executions to a size that is below the minimum. No other default sizes (i.e., FARMM and ISE market maker) are affected. These enhanced size requirements apply only to the options series in the three months closest to expiration. Moreover, the pilot does not apply to deep-in-the-money options, or an option in the last three days of that option’s trading. (See RIC 2002-05 (April 25, 2002).
