Subject: Bank of America Market Index Target Term Securities Linked to the S&P 500 Index

Background Information on the Notes

Bank of America (the “Issuer”) has issued Market Index Target-Term Securities (“MITTS”) linked to the S&P 500 Index (the “Index”). The Notes were priced at $10 each and mature on September 27, 2013.

The MITTS are senior unsecured debt securities and are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. The MITTS will rank equally with all other unsecured and unsubordinated debt, and any payments due on the MITTS, including any repayment of principal, will be subject to the credit risk of the Issuer. The MITTS provide investors with a 100% participation rate in increases in the level of the Index from the Starting Value of the Index, determined on the pricing date, to the Ending Value of the Index, determined during the Maturity Valuation Period shortly before the maturity date, subject to a maximum return of 46.4% over the Original Offering Price. Investors must be willing to forgo interest payments on the MITTS and be willing to accept a return that is capped.

At maturity, investors will receive:

- If the Ending Value of the Index is greater than the Starting Value of the Index:
  
  $10 + [$10 X ((Ending Value – Starting Value)/Starting Value)]

  Payment will not exceed the Capped Value of $14.64 per MITTS.

- If the Ending Value of the Index is less than the Starting Value of the Index:
  
  $10

The Starting Value of the Index is 1060.87. The Ending Value of the Index will be determined closer to the maturity date.

Please see the prospectus for the Notes for more details regarding the calculations and details regarding the Index.
Principal Risks

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.

Exchange Rules Applicable to Trading in the Notes

The Notes are considered equity securities, thus rendering trading in the Notes subject to the Exchanges’ existing rules governing the trading of equity securities.

Trading Hours

Trading in the Notes on ISE is on a UTP basis and is subject to ISE equity trading rules. The Notes will trade from 8:00 a.m. until 8:00 p.m. Eastern Time. Equity Electronic Access Members (“Equity EAMs”) trading the Notes during the Extended Market Sessions are exposed to the risk of the lack of the calculation or dissemination of underlying index value or intraday indicative value (“IIV”). For certain derivative securities products, an updated underlying index value or IIV may not be calculated or publicly disseminated in the Extended Market hours. Since the underlying index value and IIV are not calculated or widely disseminated during Extended Market hours, an investor who is unable to calculate implied values for certain derivative securities products during Extended Market hours may be at a disadvantage to market professionals.

Trading Halts

ISE will halt trading in the Notes in accordance with ISE Rule 2101(a)(2)(iii). The grounds for a halt under this Rule include a halt by the primary market because it stops trading the Notes and/or a halt because dissemination of the IIV or applicable currency spot price has ceased, or a halt for other regulatory reasons. In addition, ISE will stop trading the Notes if the primary market de-lists the Notes.

This Regulatory Information Circular is not a statutory Prospectus. Equity EAMs should consult the Registration Statement, or Prospectus for the Notes for relevant information.
