

NASDAQ OMX PHLX  
Options Penny Pilot Expansion Report 5  
May 29, 2009

## Summary

This is the fifth NASDAQ OMX PHLX report on the Penny Pilot program. The results are consistent with the earlier reports. Compared to before the penny pilot, quoted spreads declined, quote size at the inside declined, and quote traffic increased. The results in this analysis reflect the combined impacts of the penny pilot and increased volatility in financial markets, as reflected in the VIX (Figure 1).

Compared to the previous penny pilot report, in the latest period quoted spreads declined, quote size at the inside increased, and message traffic decreased. These trends are partly caused by the decline in perceived market risk compared to the previous period (Figure 1).

**Figure 1 - CBOE Volatility Index (VIX)**

## General

This report provides quote information for three time periods:

- Before penny pilot – covering 3 months before a symbol was added to the penny pilot stocks.
- The period of the previous penny pilot extension – August 1, 2008 to January 31, 2009.
- The period of the latest extension – February 1 – April 30, 2009.

Much of the data provided here is aggregated across symbols. We provide four symbol groups: 1) all 63 symbols, 2) 13 original symbols, 3) 22 first expansion symbols, and 4) 28 second expansion symbols. Some symbols ceased trading during the intervals reducing the total number in each group.

We spot-tested and found that the un-weighted, aggregate data provided here provides an accurate representation of trends in spreads and size in the individual symbols.

Although weighted averages are more appropriate, they did not significantly change the direction and magnitude of change between the time periods. We provide several disaggregated tables to highlight differences across individual symbols.

### **Quoted Spreads – NBBO**

Compared to before the penny pilot, the latest period had lower spreads for all penny pilot symbols up to \$20 premiums and 9 months to expiration. The latest period also had significantly lower spreads than the previous penny pilot extension. Table 1 is representative, showing the overall trends in spreads over all months. More details are found in the appendix tables A1-A4, A9, and A11.

**Table 1 :: NBBO Un-weighted Average Spread :: All 63 symbols :: \$**

Option premium	All months				
	(1) Before	(2) Aug08 - Jan09	(3) Feb09 - Apr09	Pct Change (1) - (3)	Pct Change (2) - (3)
<1	0.084	0.068	0.035	(58.07%)	(48.62%)
1-<3	0.112	0.096	0.050	(55.14%)	(47.97%)
3-<5	0.174	0.160	0.106	(38.94%)	(33.62%)
5-<10	0.204	0.211	0.140	(31.37%)	(33.63%)
10-<20	0.253	0.322	0.208	(17.64%)	(35.23%)
20+	0.307	0.548	0.361	17.53%	(34.11%)

Front month spreads declined most, up to premiums of \$20 (Table 2). Considering the significant increase in volatility between the before and current periods, it is not surprising that spreads for higher prices and longer expirations increased. Spreads in the latest period declined across the board compared to the previous extension; reflecting the decline in market volatility.

**Table 2 :: NBBO Un-weighted Average Spread :: All 63 symbols :: \$**

Option premium	1 month to expiration				
	(1) Before	(2) Aug08 - Jan09	(3) Feb09 - Apr09	Pct Change (1) - (3)	Pct Change (2) - (3)
<1	0.073	0.033	0.021	(70.77%)	(35.94%)
1-<3	0.104	0.062	0.044	(58.23%)	(29.67%)
3-<5	0.169	0.123	0.100	(41.21%)	(18.96%)
5-<10	0.194	0.168	0.126	(34.83%)	(24.83%)
10-<20	0.228	0.240	0.167	(26.61%)	(30.46%)
20+	0.245	0.312	0.251	2.74%	(19.50%)

Front month average spreads declined for almost all symbols (Table 3 and details in Table A11). Average spreads in this category declined more than 50%. Volume-weighted and un-weighted results were nearly identical.

**Table 3 :: NBBO Average Spread :: One Month to Expiration :: \$**

All 63 symbols	Premium < \$1					
	Symbol	(1) Before	(2) Aug08 - Jan09	(3) Feb09 - Apr09	Pct Change (1) - (3)	Pct Change (2) - (3)
Un-weighted Average		0.073	0.033	0.021	(70.8%)	(36.2%)
Weighted Average		0.072	0.030	0.019	(73.1%)	(35.6%)
Minimum		0.055	0.017	0.014	(83.4%)	
Maximum		0.121	0.084	0.068	9.4%	

QQQQ front month spreads declined for premiums up to \$10. As seen in the aggregate statistics, spreads declined significantly between the latest penny pilot extension and the previous one.

**Table 4 :: NBBO Un-weighted Average Spread :: QQQQ :: \$**

Option premium	1 month to expiration				
	(1) Before	(2) Aug08 - Jan09	(3) Feb09 - Apr09	Pct Change (1) - (3)	Pct Change (2) - (3)
<1	0.055	0.018	0.015	(72.31%)	(14.61%)
1-<3	0.074	0.030	0.022	(69.74%)	(25.42%)
3-<5	0.119	0.057	0.037	(68.93%)	(35.31%)
5-<10	0.127	0.148	0.072	(43.70%)	(51.72%)
10-<20	0.128	0.284	0.134	4.52%	(52.70%)
20+	0.127	0.478	0.238	87.55%	(50.16%)

### Quote Size at the Inside – NBBO

Average individual quote size at the NBBO (Table 5 and details in appendix Tables A5 – A8 and A10) declined significantly for the penny pilot options, but during the latest extension the trend reversed and quoted size increased across the board, though still significantly lower (52-91% lower) than the Before period.

**Table 5 :: NBBO Average Quote Size :: ALL 63 symbols :: Contracts**

	All months				
	(1) Before	(2) Aug08 - Jan09	(3) Feb09 - Apr09	Pct Change (1) - (3)	Pct Change (2) - (3)
<b>63 symbols</b>	1,767	313	514	(70.94%)	64.08%
<b>13 symbols</b>	4,041	424	683	(83.11%)	60.97%
<b>22 symbols</b>	1,323	314	476	(64.05%)	51.45%
<b>28 symbols</b>	976	257	459	(52.92%)	78.78%
<b>QQQQ</b>	21,337	1,387	1,740	(91.85%)	25.45%

### Quote Message Traffic – PHLX

Overall quote traffic in the latest period is 278% higher than before the penny pilot (Table 6 and appendix Table A15, excluding 5 pilot symbols no longer traded). Quote traffic in the latest period was down in most Pilot classes compared to the previous penny pilot extension, though still significantly higher (up to 1975% higher) than the Before period. This reversal, likely the result of lower market volatility, demonstrates the importance of events outside of the penny pilot in determining quote traffic. There

was also significant variation across symbols, with many symbols experiencing much smaller increases in traffic and even a few with declines (Table A11). All four declines occurred where the underlying stock prices fell to low single digit prices (AMD, AIG, GM and FLEX) .

**Table 6 :: Average Daily Outbound PHLX Quotes :: Thousands**

	Symbol	(1) Before	(2) Aug08 - Jan09	(3) Feb09 - Apr09	Pct Change (1) - (3)	Pct Change (2) - (3)
