Memo No.#0413-07

**Bernard Donnelly**  
Vice President  
Quality Assurance/Quality Control

February 21, 2007

To: All Members and Member Firms  
Subject: Daylight Savings Time System Verification Testing.

---

Due to a 2005 Federal energy conservation initiative, 2007 will mark the first year in which Daylight Savings Time ("DST") will begin three weeks earlier (March 11<sup>th</sup>) and end one week later (November 4<sup>th</sup>) than previous years. The Philadelphia Stock Exchange's (PHLX) Data Management Division has endeavored to ensure all required patches and upgrades have been applied to all internal exchange systems. We anticipate a smooth transition, however, to assist the Member Firms with system preparedness for the subsequent business day the PHLX will make all Trading System platforms available on the morning of March 11<sup>th</sup> for those Member Firms who would like to conduct some preliminary application testing.

**Test Date:** Sunday, March 11, 2007 – Network and Application level verification testing.

**Test Times:** Session 1: 9:30 until 10:30 am (EST.)  
Session 2: 10:30 until 11:30 am (EST.)

**Test Symbols:** Will be provided to registered Member Firms

Member Firms wanting to participate on the above stated date must register with the PHLX by contacting the Technical Account Management Group at **215-496-5310** or email [QATAMG@PHLX.COM](mailto:QATAMG@PHLX.COM). The cut-off date for registration is end of business day **March 5, 2007**. If emailing your request please provide the following information; Company's name, contact name and number, test time and the specific trading platform to be tested. Member Firms who have registered with the exchange will be provided with a test script in accordance to the platform they will be testing.

On the scheduled test date Member Firms should call into the following PHLX Operations Data Center numbers, **215-496-5050 or 215-496-5052**.

Member Firms who experience any difficulties in establishing their connections and/or any time related issues on the subsequent business day, Monday, March 12<sup>th</sup>, should contact the System Support Group at **215-496-1571**.

If you have any questions or require additional information regarding this notice you may contact myself at 215-496-5056, or Annette Ward at 215-496-5550.
