Memo No. # 68-07

January 10, 2007

To: All PHLX XLE Broker Cross Application Users

Subject: PHLX XLE Broker Cross Application Conversion to Citrix Server Platform

Please be advised that the Philadelphia Stock Exchange's (PHLX) Financial Automation ("FA") Division has successfully completed the installation of the PHLX XLE Broker Cross application onto our internal Citrix Server to allow automated upgrades to the application. This change will eliminate manual software upgrades to the Broker Cross application on your PC's.

As a result of this network change Member Firms will be required to change their Broker Cross application host network IP address and port to a new network IP address and ports by **January 31, 2007**. For ease of conversion we have attached a cross-reference table outlining the new host address and ports and the related current host IP address and port;

Current IP Addresses	Current Port	New IP Address	New Ports
12.41.5.39 & 12.41.5.40	5000	12.41.5.17	80 & 443
206.60.138.62 (Radianz Users)		67.56.201.153 (Radianz Users)	

Additionally, effective immediately, all new requests for Broker Cross access will be required to utilize the new PHLX host application IP address and ports.

In order to complete your migration by the January 31, 2007 target date, Member Firms should begin planning as soon as possible by contacting the Technical Account Management Group at 215-496-5310 or email QATAMG@PHLX.COM to schedule a conversion date(s) sooner rather than later to ensure a smooth and seamless conversion.

If you have any questions or require additional information regarding this change to the Broker Cross Application you may contact Jill Smith at 215-496-5473.
